<b>Movement in Shareholder Free Cash – Dividend Accrual Basis (1)</b>	<b>437</b>	<b>1 177</b>	<b>(89)</b>	<b>(343)</b>
Operating Cash Flow	4 055	6 272	3 247	5 343
IFRS Normalised Operating Profit net of Tax Expense	5 436	9 465	4 343	8 356
<b>Cash Conversion Ratio</b>	<b>75%</b>	<b>66%</b>	<b>75%</b>	<b>64%</b>

The cash conversion ratio is calculated as Operating Cash Flow per the Group shareholder free cash movement, divided by Normalised profit from operations (IFRS total) net of Income tax expense (IFRS total) per A.1 Segment Information.

### Restatement of Operating Cash Flow

From FY2024, and restated for prior periods, the net external FinRe cash flows for VitalityLife (relating to the partial funding of new business acquisition costs) have been reallocated to "Operating Cash Flow", with FinRe repayments included in "Cash Generated from In-Force Before Financing and Tax" and new FinRe receivables offset against "New Business Net of External Financing". Previously, the net external FinRe cash flows for VitalityLife were included in "Financing and Matching Activities".

Vitality Life utilises FinRe to manage the upfront acquisition costs of writing new business. To the degree that FinRe is raised specifically for the purpose of writing new business, management believes offsetting this funding against new business acquisition costs is a more informative representation of operational cash flow, which has led to this enhancement. The increased use of FinRe in the reporting period follows the significant increase in new business volumes in VitalityLife from FY2024, represented in "New Business Net of External Financing" in the Movement in Shareholder Free Cash. The following table indicates the portion of "Operating Cash Flow" representing the net external FinRe cash flows for VitalityLife, previously disclosed in "Financing and Matching Activities":

R millions	H1 FY2025	FY2024	H1 FY2024	FY2023
Operating Cash Flow - Before Net New Business Funding (Repayments and Funding)	3 332	5 322	2 902	5 337
Net New Business Funding (Repayments and Funding)	723	950	345	6
<b>Operating Cash Flow</b>	<b>4 055</b>	<b>6 272</b>	<b>3 247</b>	<b>5 343</b>

<b>Movement in Shareholder Free Cash</b>	<b>35</b>	<b>1 465</b>	<b>(390)</b>	<b>397</b>

### Notes

"Movement in Shareholder Free Cash" is an estimate of shareholder free cashflow. Life and Invest and VitalityLife are included based on the change in the Adjusted Net Worth in the Embedded Value. Changes in working capital are not allowed for in the estimate.

1) This view of the movement in shareholder free cash flow aligns the dividend paid to the period against which the cash flow was generated to fund it. For 31 December 2024, the declared dividend of R591m, per the interim financial results, is used as the dividend accrued in respect of the six month period.

2) "Profit for the period" for H1 FY2024 and FY2023 has been restated as a result of prior period errors - refer to D.1.1 for more detail. The restatements do not affect the net Movement in Shareholder Free Cash Flow for those periods as they relate to movements in Vitality Life Limited's net assets under insurance contracts, which are non-cash flow movements. The offsetting adjustment has been included in "Increase in Negative Reserves and Invest DAC (Net of tax)" in the build-up above.

## Reconciliation of operating profit to normalised operating profit

for the six months ended 31 December 2024

# Systematic rates impacts on earnings projections

## Implied future CPI rates depend on prevailing yield curves

Nominal spot rate curve

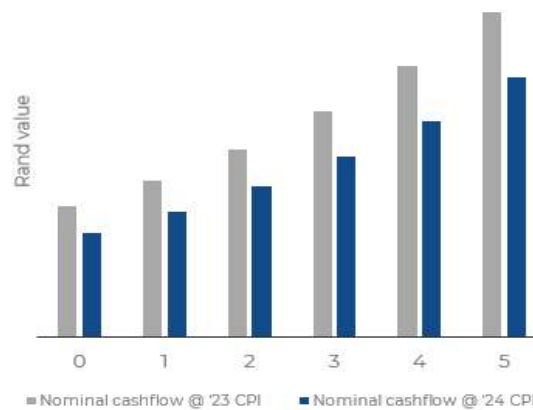

Real spot rate curve

Implied CPI spot rate curve

## Implied future CPI levels impact nominal projected cashflow

• **Lower CPI** implies **lower nominal cashflow** required to **maintain real value** over time.

• **Lower interest accretion** required maintain real value.

## IFRS 17 with OCI elected

- OCI absorbs present value in-period changes of economic assumptions.
- Systematic rate assessed annually at group level to account for changes in economic assumptions over the period.
- Given reduction in nominal cashflows from FY23 to FY24, systematic rates reduced consistently.
- Interest accretion on fulfilment cashflows reduced by cR200m for H1 FY25 (cR400m for FY25 full year).
- No material impact on present value of fulfilment cash flows.
- **OCI remains effective in reducing volatility due to economic assumption changes.**
