

# Global Megatrends Commentary<sup>1</sup>

**March 2023**

Rapid change is disrupting the status quo across industries and around the world. Our Thematic strategies seek to keep investors on the right side of disruption by looking beyond backward-looking benchmarks to identify innovative, attractively-valued companies aligned with durable secular growth themes including tech advancement, environmental sustainability, the future of health care, and the new age consumer.

Following a phenomenal period of growth and spending as the global economy recovered from the COVID pandemic-induced downturn, the equity market has pulled back recently, driven by fears around inflation, an assumed demand pull-forward, and geopolitical uncertainty. In our view, a pull-back was healthy as valuations had become elevated, especially in certain parts of the market. Valuations of innovation equities are now below their five-year average. We believe this the pull-back offers investors the opportunity to gain exposure to innovation at a much more reasonable price.

Going forward, we believe innovation equities continue to be well-positioned to outperform, even in an inflationary, rising rate environment. Ultimately, we believe the long-term growth we are likely to see in these businesses will outweigh the current tension from higher rates and other short-term structural pressures. We foresee demand for the companies in which we are invested, which benefit from strong secular tailwinds – cybersecurity, sustainability, digital transformation, decarbonization, health care innovation, and tech-enabled consumption, to name a few – accelerating rather than slowing. That said, we believe active management is even more important in the current environment, as being selective at the company level and building well-balanced portfolios will likely be key to long-term success. Overall, we retain conviction in the multi-decade secular growth themes on which our portfolios are focused, continue to believe that companies on the right side of these themes may be well-positioned to outperform, and view the market pull-back as offering an attractive entry point for long-term investors.

## Market Review<sup>2</sup>

Global equities performed well during the first quarter of 2023, returning 7.7% (total returns in USD). Markets sentiment was governed by expectations around potential peaking of inflation, the slowing pace of central bank rate hikes and receding concerns about recession. Market environment leaned more towards favoring growth-oriented stocks during the period.

Global inflationary pressures did soften during the quarter with inflation rates being 6.0% and 6.9% for US and Europe respectively. Having said that, the global markets saw a short-lived dip in March driven by increased headwinds given overall stress and concerns around asset liquidity and deposit safety. Given the turmoil, Fed decided to raise the rate by just 25 basis points later in the quarter. In Japan, the core inflation fell to 3.1% in February after reaching the 41-year high of 4.3% in January. However, the number remains above BOJ's target of 2%. The latest PMI number hinted at increase in the business activity with the composite number being above 50 in March. The overall job market seemed in good shape with decline in unemployment driven by increase in nonfarm payrolls by almost half a million with leisure, hospitality, professional and business services leading the rally. This raised optimism around the mild impact of the impending global recession.

China finally lifted its stringent zero-COVID policy which increased global hopes around the resolution of supply chain disruptions and economic recovery driven by strong domestic consumption. The international tourism industry is likely to benefit from the Chinese people being able to travel abroad freely after 3 years, leading to positive investor sentiment. With the consumption picking up, the risk appetites improved during the quarter. February marked one year since the invasion of Ukraine by Russia, but the tensions continued to remain high. The diplomatic authorities across the globe geared up to impose new set of sanctions on trades with Russia and arrange for military aid for Ukraine. The United Nations General Assembly approved a non-binding resolution calling for Russia to end hostilities and leave Ukraine. Having said that, we saw a re-escalation in US-China tensions aided by Joe Biden criticizing the Chinese intervention in the Russia-Ukraine situation.

The Financials sector recovered from the lull after investors realized the minimal systemic risk of events in the banking sector. Information Technology and Communication Services contributed the most to the overall returns with Utilities and Energy being the detractors during the Quarter

# Performance Overview

## Goldman Sachs Global Millennials Equity Portfolio

- The Goldman Sachs Global Millennials Equity Portfolio returned 14.1% (net of fees in USD) during the quarter outperforming the MSCI ACWI Growth by 33 bps and the MSCI World Index by 639 bps. This brings since inception returns to 11.1% (net of fees in USD) underperforming MSCI ACWI Growth by -76 bps and outperforming MSCI World by +72 bps.
- At the country level<sup>3</sup>, our stock selection in Italy and Taiwan contributed to portfolio performance during the quarter. On the other hand, our holdings in US and Germany detracted the most from portfolio returns.
- At sector level, our under allocation to Health Care and Financials sectors contributed to performance during the quarter. On the other hand, our allocation to Utilities and positions in Real Estate sectors detracted the most from portfolio returns.
- At the stock level:<sup>4</sup>
  - **NVIDIA (Contributor)** – The US-based manufacturer of graphic chips and processors was the biggest contributor during the quarter. The stock price rose on the back of a strong earnings, with sales and earnings being driven by both Datacenter and Gaming segments. The company continued to benefit from easing concerns as macro-economic headwinds dialed down. The company's data center business, which includes chips for AI, continued to grow, suggesting that it could continue to benefit heavily from the mass adoption and pivot towards artificial intelligence applications. We believe that the chipmaker is likely to benefit from the boom in AI, with the company recently announcing various initiatives to broaden its reach in artificial intelligence (AI) space, including partnerships and new products. NVIDIA is also diversifying into software, where they are providing AI-as-a-Service. We continue to like the company as it is expected to enjoy sustainable growth over the long term, driven by the end markets of Datacenters and Automotive applications.
  - **NextEra Energy (Detractor)** - The American energy company was the biggest detractor from relative returns during the period. The stock underperformed even after reporting strong 4Q result as it announced the departure of the CEO of their regulated utility business in Florida. The investors read this as a negative sign in relation to an ongoing investigation, potentially damaging the relationship with the state regulator. Management has reiterated that the said departure remains unrelated to the investigation. We continue to hold the stock as NextEra fundamentally continues to offer best-in-class earnings growth with high consistency and is well placed to be one of the key beneficiaries of the Inflation Reduction Act in the US.

## Goldman Sachs Global Environmental Impact Equity Portfolio

- The I Acc share class of the GS Global Environmental Impact Equity Portfolio delivered -7.5% (net of fees, USD) in absolute returns, outperforming the benchmark MSCI ACWI by 18 bps in the first quarter of 2023. This brings since inception returns to 9.7% (annualized, net of fees, USD) outperforming the benchmark by 442 bps.
- At the country level, the portfolio's positions in Japan and Germany contributed to relative performance during the quarter. On the other hand, our positions in US and Denmark detracted the most from portfolio returns.
- At the sector level, our under allocation to Financials and positions in Industrials contributed to portfolio performance during the quarter. On the other hand, our positions in Information Technology and Materials detracted from portfolio returns<sup>5</sup>.
- At the stock level:<sup>6</sup>
  - **Infineon Technologies (Contributor)** – Infineon Technologies, Germany's largest semi-conductor manufacturer, was the biggest contributor to performance during the quarter. The stock outperformed on the back of strong quarterly results. The attractive operating profits were driven by pricing, product mix and lower energy costs. Owing to their resilient automotive and industrial business, they upgraded their already strong guidance towards end of the quarter leading to positive investor sentiment. We continue to like the company because of the significant growth opportunity in the EV industry and its business strategy. Infineon is the global leader in Automotive power semiconductors providing chips that are crucial for automobile electrification and clean energy generation.
  - **NextEra Energy (Detractor)** – The American energy company was a the biggest detractor from relative returns during the period. The stock underperformed even after reporting strong 4Q result as it announced the departure of the CEO of their regulated utility business in Florida. The investors read this as a negative sign in relation to an ongoing investigation, potentially damaging the relationship with the state regulator. Management has reiterated that the said departure remains unrelated to the investigation. We continue to hold the stock as NextEra fundamentally continues to offer best-in-class earnings growth with high consistency and is well placed to be one of the key beneficiaries of the Inflation Reduction Act in the US.

## Goldman Sachs Global Future Technology Leaders Equity Portfolio

- The Global Future Technology Leaders Equity Portfolio returned 14.69% outperforming (net of fees) its benchmark, which returned 12.06% during the quarter, by **+263bps**.
- Another positive for the portfolio was **China reopening**. We saw pent up demand in the region and many of our portfolio companies with exposure to China benefit as a result both in software and hardware.
- The portfolio benefited primarily from 1) our stock selection in our themes and EM; 2) our overweight to growth and underweight to legacy tech; 3) overweight to small cap.
- Our stock selection and overweight's to our key themes were drivers of relative outperformance as many of our portfolio companies reported strong earnings and raised their guidance. Most notably, our **Consumer Internet stocks had a very strong quarter**
- At the stock level:<sup>7</sup>
  - **HubSpot** (Contributor) – an American software company engaged in cloud-based customer relationship management, was a top contributor to returns during the quarter. Revenues came in ahead of management's guidance at \$469.7MM, representing a 35% increase year-over-year and exceeding consensus estimates by 5.5%. HubSpot continued to see healthy growth during the quarter, adding over 8,500 customers whilst also maintaining a gross retention rate above 85%. The company's high-value software, coupled with feature-rich offerings and multiple modules, differentiate HubSpot from competitors and thus leads to high rates of retention and upsell opportunities. As the tech market rebounds from a tough 2022, we believe that ad-levered names like HubSpot are well positioned to benefit from innovation in artificial intelligence given that the company recently introduced a new generative AI tool called ChatSpot. We remain constructive on HubSpot and believe that the company's growth trajectory remains compelling.
  - **Kingdee International** (Detractor) – an enterprise software-as-a-service (SaaS) provider in China was a top detractor to returns during the quarter. The company faced headwinds during the quarter mainly due to investors' concerns on the growing competition in the China Enterprise resource planning (ERP) market and the company's exposure to Jack Henry and Bill Holdings; two stocks that faced pressure in the wake of the regional banking crisis in the US. Despite its underperformance during the quarter, we view Kingdee positively and believe that the company has established a leading position in servicing the emerging leaders across different sectors in new economy industries such as technology, bio-tech, and supply chains.

## Goldman Sachs Global Future Health Care Equity Portfolio

- The GS Global Future Health Care Equity Portfolio (I-Acc. Shares) returned 2.70% (net of fees) in the quarter, outperforming the MSCI ACWI Health Care benchmark by +442 bps. This brings since inception returns to 0.75% (annualized, net of fees, USD), underperforming the MSCI ACWI Health Care Index by 552 bps.<sup>8</sup>
- At the industry level, our stock selection within Health Care Equipment & Supplies and Life Science Tools & Services contributed most to relative returns, while our overweight to Equity Real Estate Investment Trusts (REITs) detracted the most from relative returns.
- At the stock level:<sup>9</sup>
  - **Seagen, Inc. (Contributor)** – an American biotechnology company that engages in the development and commercialization of targeted oncology drugs – was a top contributor to returns during the quarter. In February, Seagen reported a strong 4Q beat, driven primarily by Adcetris and Padcev sales. Management raised total revenue guidance for FY23 on the back of the team’s continued optimism for gaining market share and confidence in Padcev’s potential approval for bladder cancer. In March, Pfizer announced the acquisition of Seagen for \$229/share, at a total of \$43 billion – which led to a substantial appreciation in the stock price. With a portfolio of blockbuster drugs and a promising pipeline, we remain constructive on Seagen as a biotechnology leader.
  - **Halozyme Therapeutics, Inc. (Detractor)** – an American biotechnology company with an innovative under-the-skin drug delivery technology used by several major pharmaceutical companies including Roche, J&J, Eli Lilly, and Bristol-Myers, among others – was a top detractor from relative returns during the quarter. This month, the US’s Centers for Medicare & Medicaid Services published a proposal on drug price negotiations that could potentially remove protections for top-selling biologics – including Halozyme’s products – and the stock came under pressure on the back of that proposal. To date, Halozyme’s subcutaneous formulations of existing drugs have been considered entirely new drugs upon launch – and these new formulations restart the clock on eligibility for the drug’s Medicare price negotiation. Biologics have 13 years from launch until they reach eligibility. CMS’s recent proposal seeks to reverse this and reclassify Halozyme’s formulations as having the same launch date as the underlying drug. The ultimate outcome of CMS’s new proposal is uncertain. We remain constructive on Halozyme’s technology – which has significant benefits to both patients and the overall health care system. For example, in the case of cancer patients, Halozyme’s formulation reduces time needed for drug administration from several hours to between 5-7 minutes and dramatically improves the patient experience while saving on cost to the health care system. We will continue to monitor the CMS proposal as it unfolds.

## Appendix

### GS Global Millennials Equity Portfolio

#### Risk and Reward Profile

This risk profile is based on historical data and may not be a reliable indication of the future risk profile of the Portfolio. The risk category shown is not guaranteed and may change over time. The lowest category does not mean risk free. It is possible that a portfolio stated to have a lower risk profile may in fact fall in value more than a portfolio with a higher risk profile.

The Portfolio is in category 6 as it mostly invests in shares and similar instruments which typically experience higher levels of price fluctuations than fixed income securities.

The capital is not guaranteed.

#### Other Material Risks:

- **Market risk** - the value of assets in the Portfolio is typically dictated by a number of factors, including the confidence levels of the market in which they are traded.
- **Operational risk** - material losses to the Portfolio may arise as a result of human error, system and/or process failures, inadequate procedures or controls.
- **Liquidity risk** - the Portfolio may not always find another party willing to purchase an asset that the Portfolio wants to sell which could impact the Portfolio's ability to meet redemption requests on demand.
- **Exchange rate risk** - changes in exchange rates may reduce or increase the returns an investor might expect to receive independent of the performance of such assets. Hedging of this risk may not be fully effective and may increase other risks (e.g. derivative risk).
- **Custodian risk** - insolvency, breaches of duty of care or misconduct of a custodian or sub-custodian responsible for the safekeeping of the Portfolio's assets can result in loss to the Portfolio.
- **Derivatives risk** - derivative instruments are highly sensitive to changes in the value of the underlying asset that they are based on. Certain derivatives may result in losses greater than the amount originally invested.
- **Counterparty risk** - a party that the Portfolio transacts with may fail to meet its obligations which could cause losses.
- **Emerging markets risk** - emerging markets are likely to bear higher risk due to lower liquidity and possible lack of adequate financial, legal, social, political and economic structures, protection and stability as well as uncertain tax positions.
- **Stock Connect** - Stock Connect is a new trading programme and the relevant regulations are untested and subject to change. Investments through the Shanghai-Hong Kong Stock Connect are subject to additional risks, including amongst others, quota limitations, restrictions on selling imposed by frontend monitoring, ownership of securities held on Stock Connect applicable to certain rules, participation in corporate actions and shareholders' meetings, non-protection by any investor compensation scheme, differences in trading day, operational risk, recalling of eligible stocks and trading restrictions, trading costs (including tax), local market rules, foreign shareholding restrictions and disclosure obligations, clearing, settlement and custody risk, currency risk and default risk.
- **Sustainability risk** - an environmental, social or governance event or condition that could cause the value of the portfolio to go down. Examples of sustainability risks include physical environmental risks, climate change transition risks, supply chain disruptions, improper labour practices, lack of board diversity and corruption.
- **Concentration risk** - this is a concentrated asset strategy that is likely to exhibit a significantly greater fluctuations in asset values than a broad investment in a wide range of shares of companies.
- **For more detailed information on the risks associated with an investment in the Portfolio, please refer to the section in the Prospectus entitled "Risk Considerations" and discuss with your professional advisers.**

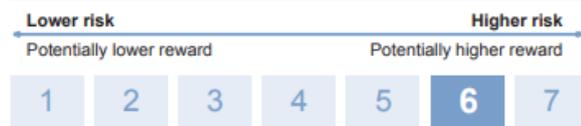

Your capital is at risk and you may lose some or all of the capital you invest

Discovery Life Investment Services (Pty) Ltd, branded as Discovery Invest, is an authorised financial services provider. Company registration number 2007/005969/07.

## GS Global Environmental Impact Equity Portfolio

### Risk and Reward Profile

This risk profile is based on historical data and may not be a reliable indication of the future risk profile of the Portfolio. The risk category shown is not guaranteed and may change over time. The lowest category does not mean risk free. It is possible that a portfolio stated to have a lower risk profile may in fact fall in value more than a portfolio with a higher risk profile.

The Portfolio is in category 6 as it mostly invests in shares and similar instruments which typically experience higher levels of price fluctuations than fixed income securities.

The capital is not guaranteed.

#### Other Material Risks:

- **Market risk** - the value of assets in the Portfolio is typically dictated by a number of factors, including the confidence levels of the market in which they are traded.
- **Operational risk** - material losses to the Portfolio may arise as a result of human error, system and/or process failures, inadequate procedures or controls.
- **Liquidity risk** - the Portfolio may not always find another party willing to purchase an asset that the Portfolio wants to sell which could impact the Portfolio's ability to meet redemption requests on demand.
- **Exchange rate risk** - changes in exchange rates may reduce or increase the returns an investor might expect to receive independent of the performance of such assets. Hedging of this risk may not be fully effective and may increase other risks (e.g. derivative risk).
- **Custodian risk** - insolvency, breaches of duty of care or misconduct of a custodian or sub-custodian responsible for the safekeeping of the Portfolio's assets can result in loss to the Portfolio.

- **Derivatives risk** - derivative instruments are highly sensitive to changes in the value of the underlying asset that they are based on. Certain derivatives may result in losses greater than the amount originally invested.

- **Counterparty risk** - a party that the Portfolio transacts with may fail to meet its obligations which could cause losses.

- **Emerging markets risk** - emerging markets are likely to bear higher risk due to lower liquidity and possible lack of adequate financial, legal, social, political and economic structures, protection and stability as well as uncertain tax positions.

- **Stock Connect** - Stock Connect is a new trading programme and the relevant regulations are untested and subject to change. Emerging markets securities may be less liquid and more volatile and are subject to a number of additional risks, including but not limited to currency fluctuations and political instability. Diversification does not protect an investor from market risk and does not ensure a profit.

## Disclosures:

This material is provided at your request solely for your use.

This material is provided at your request for informational purposes only. It is not an offer or solicitation to buy or sell any securities.

THIS MATERIAL DOES NOT CONSTITUTE AN OFFER OR SOLICITATION IN ANY JURISDICTION WHERE OR TO ANY PERSON TO WHOM IT WOULD BE UNAUTHORIZED OR UNLAWFUL TO DO SO. Prospective investors should inform themselves as to any applicable legal requirements and taxation and exchange control regulations in the countries of their citizenship, residence or domicile which might be relevant.

This material is provided for informational purposes only and should not be construed as investment advice or an offer or solicitation to buy or sell securities. This material is not intended to be used as a general guide to investing, or as a source of any specific investment recommendations, and makes no implied or express recommendations concerning the manner in which any client's account should or would be handled, as appropriate investment strategies depend upon the client's investment objectives.

Although certain information has been obtained from sources believed to be reliable, we do not guarantee its accuracy, completeness or fairness. We have relied upon and assumed without independent verification, the accuracy and completeness of all information available from public sources.

Views and opinions expressed are for informational purposes only and do not constitute a recommendation by Goldman Sachs Asset Management to buy, sell, or hold any security. Views and opinions are current as of the date of this presentation and may be subject to change, they should not be construed as investment advice.

This document has been issued by Goldman Sachs International, authorised by the Prudential Regulation Authority and regulated by the Financial Conduct Authority and the Prudential Regulation Authority.

Any mention of an investment decision is intended only to illustrate our investment strategy and is not indicative of the performance of our strategy as a whole. It should not be assumed that any investment decisions shown will prove to be profitable or any future investment decisions will be profitable or equal the performance of the investments discussed herein. The holdings and/or allocations shown may not represent all of the strategy's investments. Please contact your Goldman Sachs Asset Management representative to obtain the holdings presented above as well as each holding's contribution to performance and a complete list of past recommendations. Please see additional disclosures in the appendix.

The website links provided are for your convenience only and are not an endorsement or recommendation by Goldman Sachs Asset Management of any of these websites or the products or services offered. Goldman Sachs Asset Management is not responsible for the accuracy and validity of the content of these websites.

Documents providing further detailed information about the fund/s, including the articles of association, prospectus, supplement and key investor information document (KIID), annual/semi-annual report (as applicable), and a summary of your investor rights, are available free of charge in English language and as required, in your local language by navigating to your local language landing page via <https://www.gsam.com/content/gsam/ain/en/advisors/literature-and-forms/literature.html> and also from the fund's paying and information agents. If GSAMFSL, the management company, decides to terminate its arrangement for marketing the fund/s in any EEA country where it is registered for sale, it will do so in accordance with the relevant UCITS rules.

### Offering Documents

This material is provided at your request for informational purposes only and does not constitute a solicitation in any jurisdiction in which such a solicitation is unlawful or to any person to whom it is unlawful. It only contains selected information with regards to the fund and does not constitute an offer to buy shares in the fund. Prior to an investment, prospective investors should carefully read the latest Key Investor Information Document (KIID) as well as the offering documentation, including but not limited to the fund's prospectus which contains inter alia a comprehensive disclosure of applicable risks. The relevant articles of association, prospectus, supplement, KIID and latest annual/semi-annual report are available free of charge from the fund's paying and information agent and/or from your financial adviser.

### Distribution of Shares

Shares of the fund may not be registered for public distribution in a number of jurisdictions (including but not limited to any Latin American, African or Asian countries). Therefore, the shares of the fund must not be marketed or offered in or to residents of any such jurisdictions unless such marketing or offering is made in compliance with applicable exemptions for the private placement of collective investment schemes and other applicable jurisdictional rules and regulations.

### Investment Advice and Potential Loss

Financial advisers generally suggest a diversified portfolio of investments. The fund described herein does not represent a diversified investment by itself. This material must not be construed as

**Your capital is at risk and you may lose some or all of the capital you invest**

Discovery Life Investment Services (Pty) Ltd, branded as Discovery Invest, is an authorised financial services provider. Company registration number 2007/005969/07.

**Past performance does not guarantee future results, which may vary. The value of investments and the income derived from investments will fluctuate and can go down as well as up. A loss of principal may occur.**

References to indices, benchmarks or other measures of relative market performance over a specified period of time are provided for your information only and do not imply that the portfolio will achieve similar results. The index composition may not reflect the manner in which a portfolio is constructed. While an adviser seeks to design a portfolio which reflects appropriate risk and return features, portfolio characteristics may deviate from those of the benchmark.

An investor should only invest if he/she has the necessary financial resources to bear a complete loss of this investment.

Capital is at risk.

This material contains information that discusses general market activity, industry or sector trends, or other broad-based economic, market or political conditions. It also pertains to past performance or is the basis for previously-made discretionary investment decisions.

This information should not be construed as a current recommendation, research or investment advice. It should not be assumed that any investment decisions shown will prove to be profitable, or that any investment decisions made in the future will be profitable or will equal the performance of investments discussed herein. Any mention of an investment decision is intended only to illustrate our investment approach and/or strategy, and is not indicative of the performance of our strategy as a whole. Any such illustration is not necessarily representative of other investment decisions.

This material has been prepared by Goldman Sachs Asset Management and is not financial research nor a product of Goldman Sachs Global Investment Research. It was not prepared in compliance with applicable provisions of law designed to promote the independence of financial analysis and is not subject to a prohibition on trading following the distribution of financial research. The views and opinions expressed may differ from the views and opinions expressed by Goldman Sachs Global Investment Research or other departments or divisions of Goldman Sachs and its affiliates. Investors are urged to consult with their financial advisors before buying or selling any securities. This information should not be relied upon in making an investment decision.

Please note that for the purposes of the European Sustainable Finance Disclosure Regulation ("SFDR"), the product is an Article 8 product that promotes environmental and social characteristics. Please note that this material includes certain information on Goldman Sachs's sustainability practices and track record, at an organizational and investment team level, which may not necessarily be reflected in the portfolio. Please refer to the offering documents of any product(s) prior to investment, for details on how and the extent to which the product(s) takes ESG considerations into account on a binding or non-binding basis.

Environmental, Social and Governance ("ESG") strategies may take risks or eliminate exposures found in other strategies or broad market benchmarks that may cause performance to diverge from the performance of these other strategies or market benchmarks. ESG strategies will be subject to the risks associated with their underlying investments' asset classes. Further, the demand within certain markets or sectors that an ESG strategy targets may not develop as forecasted or may develop more slowly than anticipated.

#### Index Benchmarks

Indices are unmanaged. The figures for the index reflect the reinvestment of all income or dividends, as applicable, but do not reflect the deduction of any fees or expenses which would reduce returns. Investors cannot invest directly in indices.

The indices referenced herein have been selected because they are well known, easily recognized by investors, and reflect those indices that the Investment Manager believes, in part based on industry practice, provide a suitable benchmark against which to evaluate the investment or broader market described herein. The exclusion of "failed" or closed hedge funds may mean that each index overstates the performance of hedge funds generally.

investment or tax advice. Prospective investors should consult their financial and tax adviser before investing in order to determine whether an investment would be suitable for them.

#### Swing Pricing

Please note that the fund operates a swing pricing policy. Investors should be aware that from time to time this may result in the fund performing differently compared to the reference benchmark based solely on the effect of swing pricing rather than price developments of underlying instruments.

The Global Industry Classification Standard (GICS) was developed by and is the exclusive property and a service mark of Morgan Stanley Capital International Inc. (MSCI) and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. (S&P) and is licensed for use by Goldman Sachs. Neither MSCI, S&P nor any other party involved in making or compiling the GICS or any GICS classifications makes any express or implied warranties or representations with respect to such standard or classification (or the results to be obtained by the use thereof), and all such parties hereby expressly disclaim all warranties of originality, accuracy, completeness, merchantability or fitness for a particular purpose with respect to any of such standard or classification. Without limiting any of the foregoing, in no event shall MSCI, S&P, any of their affiliates or any third party involved in making or compiling the GICS or any GICS classifications have any liability for any direct, indirect, special, punitive, consequential or any other damages (including lost profits) even if notified of the possibility of such damages.

Portfolio Holdings may not be representative of current or future investments. The securities discussed may not represent all of the portfolio's holdings and may represent only a small percentage of the strategy's portfolio holdings. Future portfolio holdings may not be profitable.

Accordingly, these forecasts should be viewed as merely representative of a broad range of possible outcomes. These forecasts are estimated, based on assumptions, and are subject to significant revision and may change materially as economic and market conditions change. Goldman Sachs has no obligation to provide updates or changes to these forecasts. Case studies and examples are for illustrative purposes only.

Any reference to a specific company or security does not constitute a recommendation to buy, sell, hold or directly invest in the company or its securities. It should not be assumed that investment decisions made in the future will be profitable or will equal the performance of the securities discussed in this document.

#### Confidentiality
