HOW TO SEARCH FOR SPECIFIC HEALTHCARE DISCIPLINES

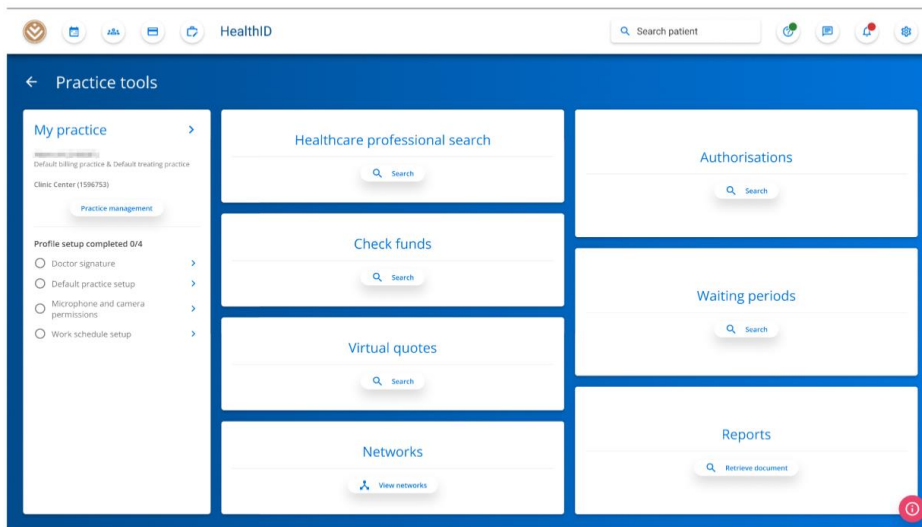

DISCOVERY HEALTH
2023

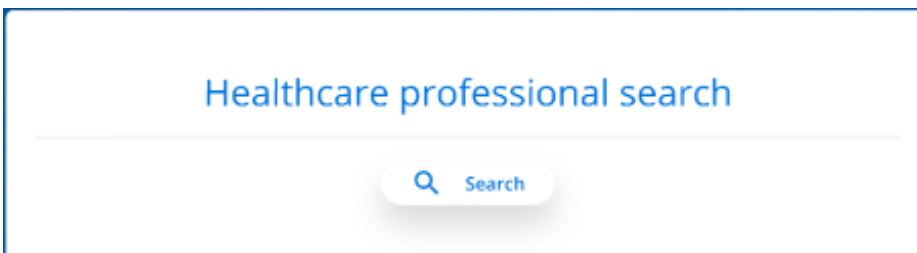

How to search for specific healthcare disciplines

1. Navigate to the **Practice tools** section from the dashboard or the header.

Practice tools.

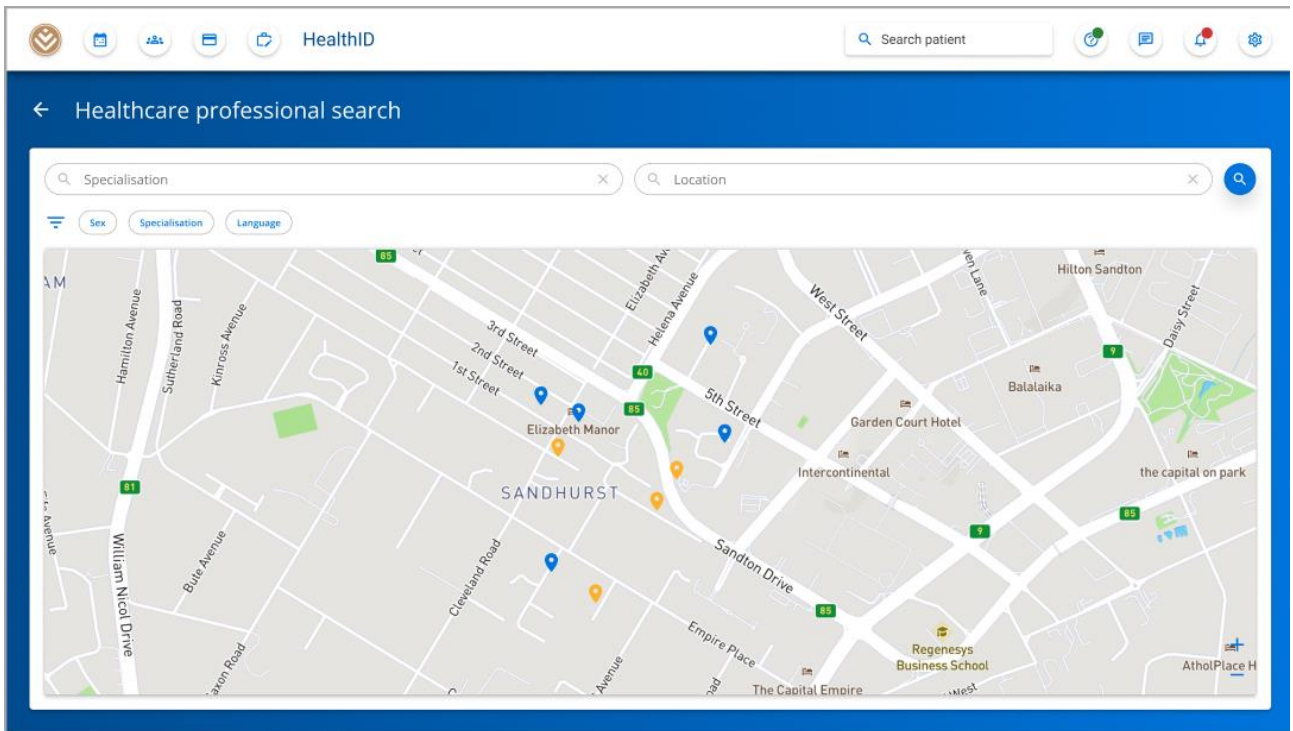

2. Click the **Search** button on the **Healthcare professional search** card

Healthcare professional search card.

3. The default **Healthcare professional search** screen will show a map of your current location.

Healthcare professional search.

4. How to narrow down your search:

- You can use the **Specialisation** search bar to narrow down the search results to only healthcare professionals of the specified specialisation.
- You can use the **Location** search bar to narrow down the geographical location in which the healthcare professionals must practice.

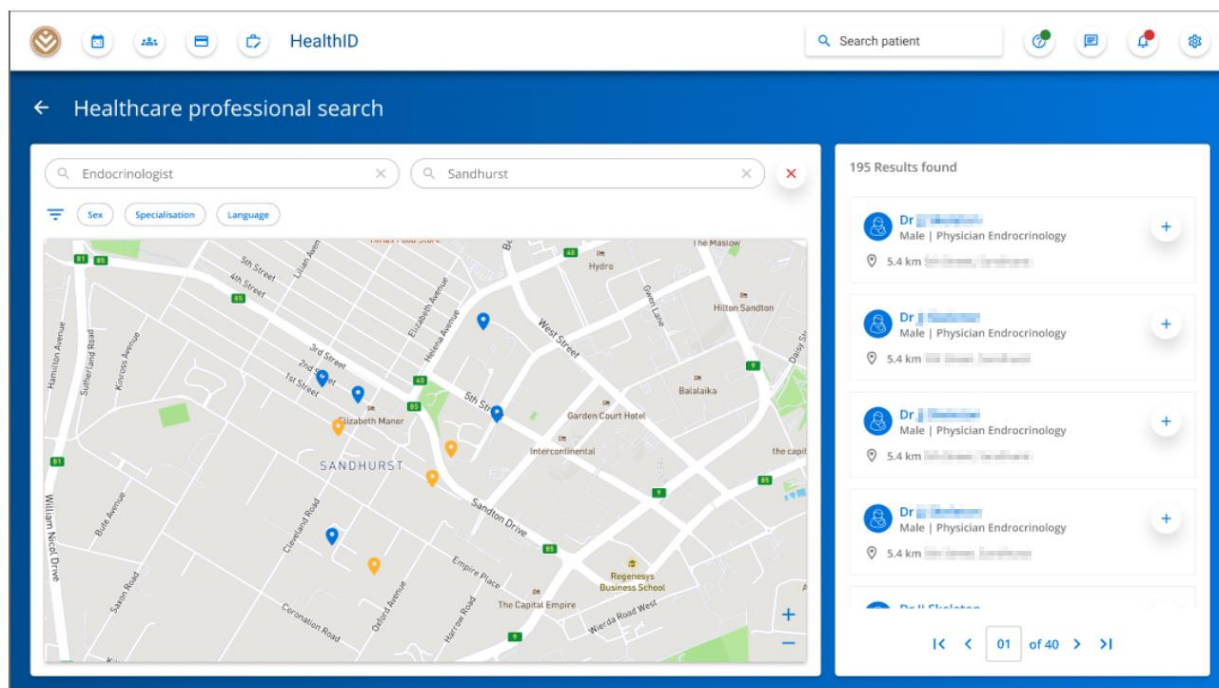

Click on the magnifying glass icon to start the healthcare professional search. Once the results loaded, you can use the **X** icon to clear the two search bars and reset the search.

Specialisation and Location search bars.

- Once you started the search by clicking on the magnifying glass, a list of results based on the search criteria will display to the right of the map.
