Introducing Finance Academy

Consisting of 18 CPD-ethics accredited online short courses, offered by Healthy Company for Doctors and Worth, these are **designed to help you increase cash flow, reduce debt, and build wealth.**

FINANCE ACADEMY

Finance Academy, a core piece of the **Finance 360 pillar**, is a financial wellness training platform that educates and empowers healthcare professionals to enhance their personal money management.

Globally and in South Africa, consumers are struggling with a cost-of-living crisis that has been exacerbated by sustained high interest rates.

This is against the backdrop of the 'perfect storm' comprising the COVID-19 pandemic, July 2021 civil unrest and the April 2022 Kwa-Zulu Natal floods which had a devastating impact on South African healthcare professionals both personally and from a business practice perspective.

It shone a light on the fact that despite South African doctors being known as some of the best clinically trained healthcare professionals in the world, with no financial or business education, they have been left exposed and vulnerable to financial challenges.

Through Healthy Company for Doctors, Discovery has found a way to address these challenges utilising a customised, digital offering of online short courses that have been built by independent financial behavioural change experts, Worth. Spanning a wide variety of topics designed to meet doctors needs at every age and stage of their professional journey, they are **CPD-ethics accredited** (one ethics point per short course) and can be completed at the discretion and convenience of the healthcare professional.

What is Finance Academy?

Finance Academy is a **financial education and training platform available to healthcare professionals** through Healthy Company for Doctors.

Completion of these courses is designed to improve the money skills, knowledge and confidence of healthcare professionals around a broad array of financial topics.

Provided by Worth, South Africa's leading financial education company

These are the 18 different short courses available for you to choose from.
Click on any of the titles to find out more about what you can learn.

Value to you

Through this partnership with South Africa's leading financial education company, you and your practice stand to benefit in numerous ways when you sign up for this benefit:

01 Improved skills

Simplified money management skills brought to life with relevant case studies, enhanced by downloadable templates, and easy-to-use 'cheat sheets', all supported by Worth's helpdesk.

02 Greater confidence

Implementing these new skills, inspired by the stories shared by experts and laymen alike, improves confidence while reducing financial stress, allowing you more time to do what you love.

03 Enhanced insight

- Positively impact wellness metrics.
- Understand the impact that financial stress has on physical and mental health.
- Leading by example.

Personal and practice support

Easy access to an independent financial wellness platform is critical to addressing the challenges identified in our profession, and we want to help you set up your practice to be able to benefit from this journey.

We are reaching out to healthcare professionals to offer support with accessing the Finance Academy. If we have not contacted you yet or if your practice is already using the Finance Academy platform and would like us to contact you immediately, please let us know using our practice support contact details.
