Global megatrends overview

In this changing world, trends are emerging that are set to transform investment markets globally. Four megatrends in particular have been globally recognised as macroeconomic forces that will fundamentally shape the world going forward, including some of society's biggest challenges – and opportunities.

The four megatrends redefining the investment space

Introducing the Discovery Global Megatrends Fund

The Discovery Global Megatrends Fund will provide clients with unique exposure to these four fundamental trends, by equally allocating to four Goldman Sachs Asset Management equity portfolios – each focusing on a specific megatrend. The Discovery Global Megatrends Fund is available on all local and global products, except Flexible Investments.

 Offered on both our local and offshore platforms **ZAR & USD**

Important information about investing in this fund

The Global Megatrends Fund is a portfolio within an investment policy issued by Discovery Life Limited. Discovery Life is the owner of the underlying GSAM funds (ZAR) or an equity linked note (USD) giving exposure to the funds.

Equal allocation to four top-performing equity portfolios

25% Technological advancement

Goldman Sachs Global Future Technology Leaders Equity Portfolio

Invests primarily in equity securities of companies around the world that have the potential to benefit from technology proliferation.

25% Environmental sustainability

Goldman Sachs Global Environmental Impact Equity Portfolio

Invests primarily in equity securities around the world that are aligned to the key themes associated with solving environmental problems.

25% New-age consumer

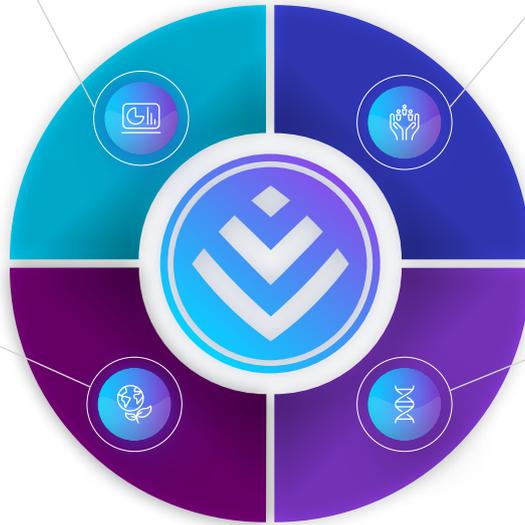

Goldman Sachs Global Millennials Equity Portfolio

Invests primarily in equity securities of companies around the world that have the potential to benefit from the behaviour of the millennial generation.

25% Future of healthcare

Goldman Sachs Global Future Healthcare Equity Portfolio

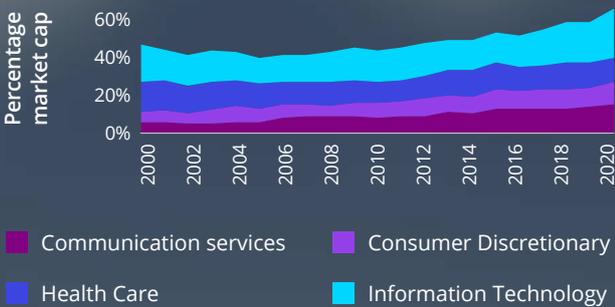

Invests in companies all around the world that have the potential to benefit from trends in the healthcare sector, including advancements in genomics, precision medicine, life extension and robotic surgery.

Sector growth

With the technology, healthcare and communication services sectors of the Standard and Poor's 500 (S&P) seeing an increase in market share over the past decade, it is clear that these sectors are providing investors with growth potential.

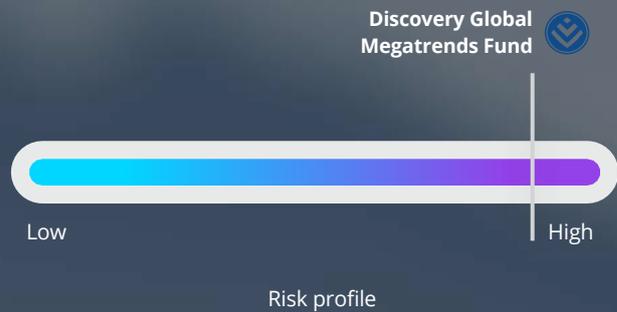

S&P % sector market cap over time

Risk profile

The Discovery Global Megatrends Fund caters for a high-risk profiled client who wants access to various markets and sectors with the potential of benefiting from the four key megatrends.

In addition to the possibility of enhanced growth from exposure to these megatrends, the Discovery Global Megatrends Fund can provide enhanced portfolio diversification. This is done through access to sectors and industries not available for investment in South Africa. In addition, the megatrends show very low correlation to one another, suggesting that clients can improve their investment portfolio risk-return profile through the Discovery Global Megatrends Fund.

Correlation

Low correlation between trends suggests the ability to create an enhanced risk-return profile when used in combination.

	Environment	Future Healthcare	New-age consumer	Future technology
Environment	1.00	-0.19	0.15	0.26
Future Healthcare	-0.19	1.00	0.17	-0.10
New-age consumer	0.15	0.17	1.00	0.59
Future technology	0.26	-0.10	0.59	1.00

Comparison between return, active risk of individual thematic portfolio and combined

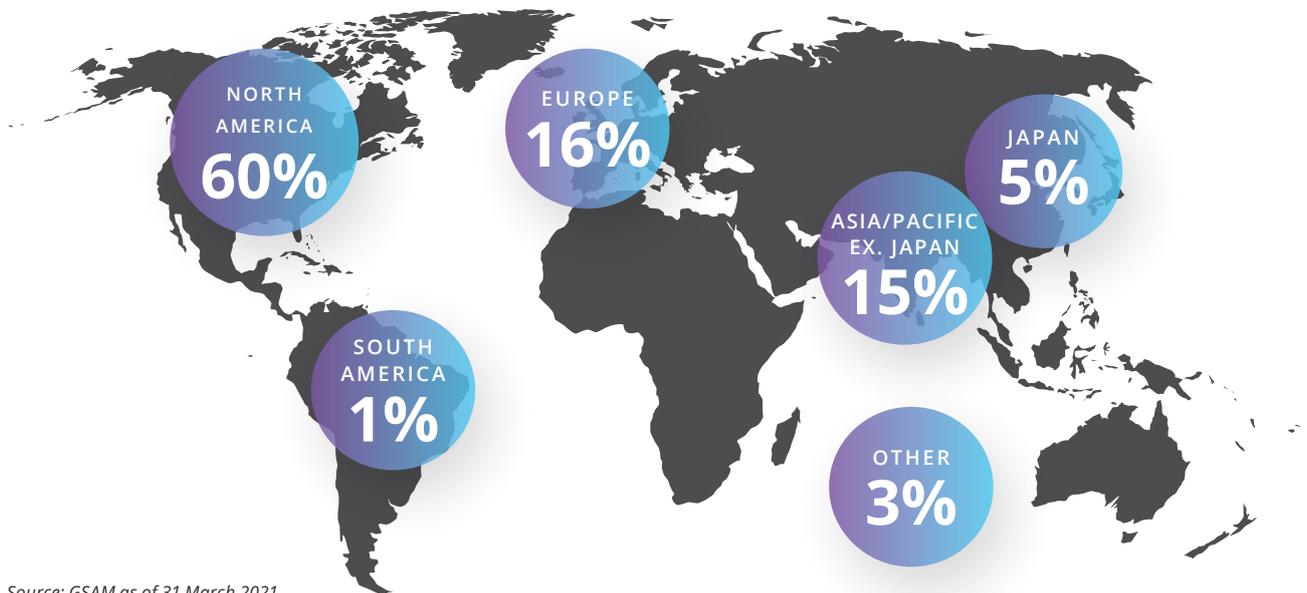

Each of the megatrends offers returns above that of the MSCI ACWI benchmark, however, there is substantial risk underlying each trend. By combining the megatrends equally, we are able to create a fund that offers a better risk-adjusted return.

Integration

Qualifies for boosts, fee discounts, currency enhancer and integration

Asset management fee

Annual asset management fees
Local: 1.75% | USD: 1.65%

Rebalancing

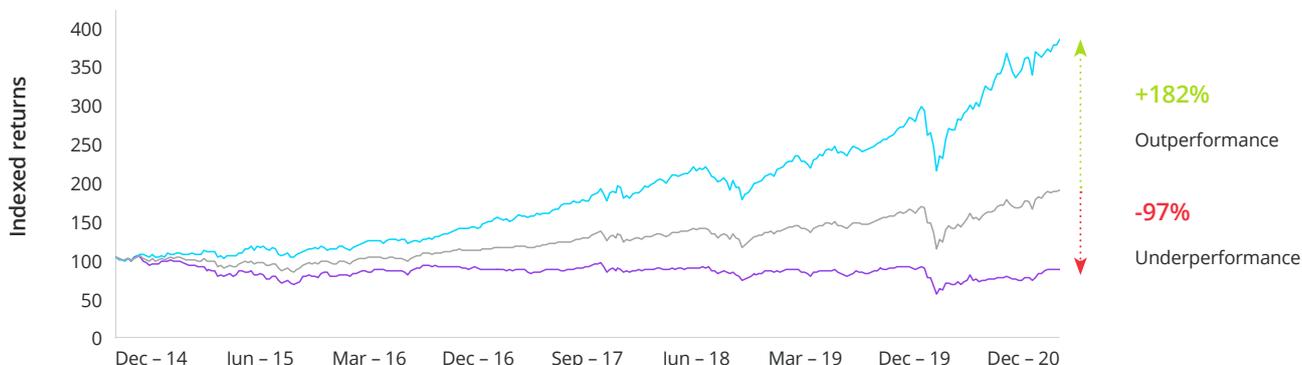

Rebalanced twice a year

Past performance

To illustrate how these secular themes or megatrends have affected the investment space over the last five years, consider the graph below. It shows how companies that are aligned to secular growth themes have performed relative to those that are not.

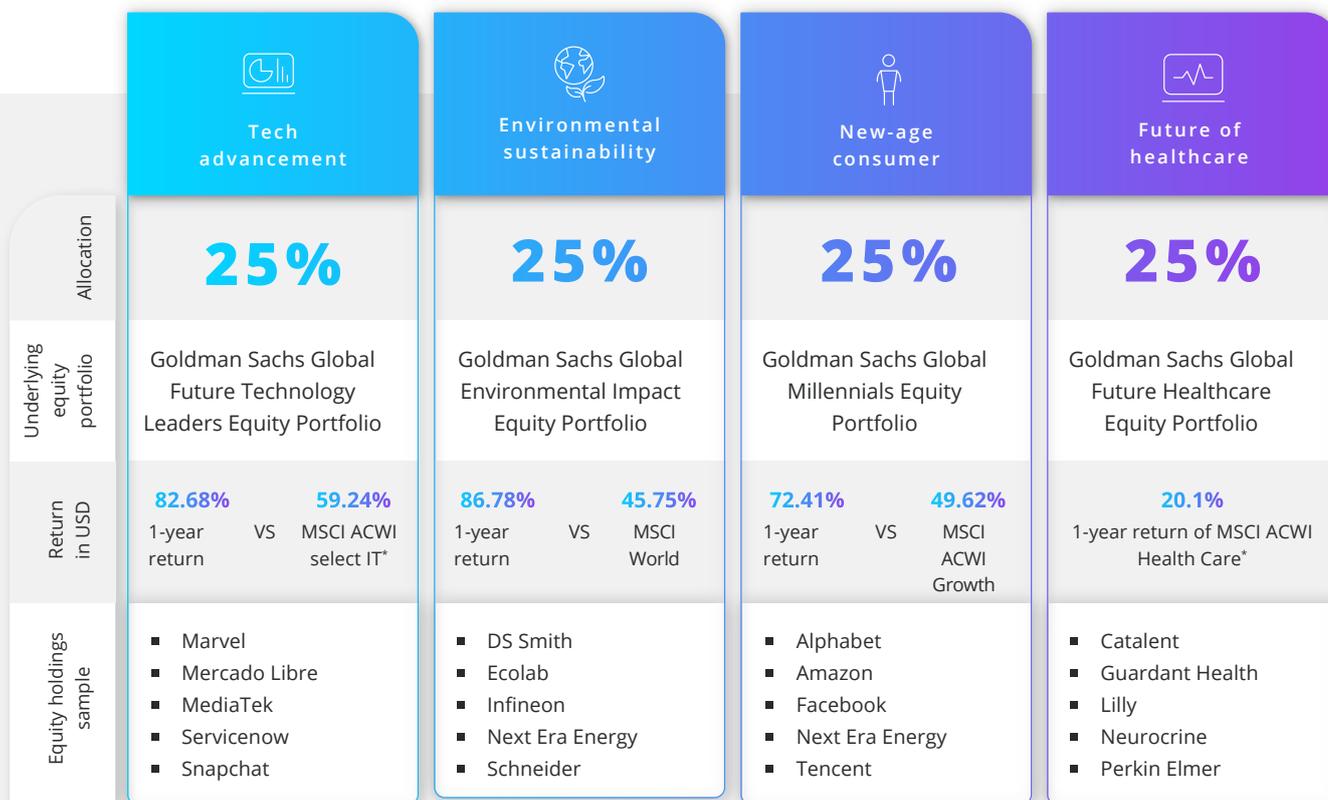

S&P % sector decomposed

- Disrupted/Shares misaligned to secular growth themes
- Disruptor/Shares aligned to secular growth themes
- S&P 500

Source: GSAM, based on the proprietary research of the Fundamental Equity team, as of December 2020. Past performance does not guarantee future results, which may vary

We also see this strong performance of thematic-style investment in the performance of the underlying Goldman Sachs equity portfolios which comprise the Discovery Global Megatrends Fund. Each of these portfolios individually focuses on current and relevant trends that are shaping the world around us and as a result have been strong relative to the respective MSCI indices.

Please note that past performance is not indicative of future performance. Figures are for illustrative purposes only.

Source: Performance data from GSAM and MSCI as of 30 April 2021.

* As there is less than one year's past performance data for the Goldman Sachs Global Future Healthcare Equity Portfolio, the MSCI ACWI Health Care Index has been used to illustrate indicative past performance.
