

Introducing the Once-off Personal Health Fund **Boost**

Discovery Health Medical Scheme's strong financial position and sustained growth create a clear opportunity to return more value to members in 2026. To support you further, we are excited to introduce the Once-off Personal Health Fund Boost for 2026.

The Personal Health Fund Boost provides an added once-off **R1,000** per beneficiary into the Personal Health Fund in 2026. This is extra value, over and above existing Personal Health Fund benefits for 2026. You can use this amount for qualifying day-to-day healthcare expenses such as GP visits and medicine.

HOW THE BENEFIT WORKS

01 | A Once-off R1,000 in the Personal Health Fund

- Each beneficiary on the membership can receive a once-off additional R1,000 in the Personal Health Fund, up to a maximum of **R6,000** per membership.
- The Boost does not accumulate to existing Personal Health Fund limits.

02 | Earn the Boost by:

- Activating **Personal Health Pathways** and **enabling sleep and physical activity tracking** in the Discovery Health app
- Completing a **Health Check** during 2026.

Each adult who completes these steps earns R1,000 in the Personal Health Fund.

03 | Earn child benefits:

- Once all adults on the membership have completed the steps, an extra R1,000 for every child dependant on the health plan is added automatically to the Personal Health Fund up to the overall family limit of **R6,000**.

Once you complete the required steps in 2026, the Once-off Boost will automatically be added to your Personal Health Fund from May 2026.
