Transaction cut-off time:	16:00

Notes

1. Benchmark and performance data is provided by Cogence (Pty) Ltd.
2. There have been no material changes to the fund details displayed above since the fund launch.

Investment policy

The objective of this fund is to provide investors with a high level of income while seeking opportunities to maximize capital gains. This will be achieved by investing in collective investment schemes in accordance with the Act that have a bias to local and international bonds, corporate bonds and other securities that offer a high return of income. The fund will be actively managed and the Manager will be permitted to invest in offshore investments as legislation permits.

Who this investment may be suitable for

The fund is suitable for investors seeking a high level of income and stable capital growth, with a low tolerance for capital loss.

The fund has adhered to its policy objectives as stated in the supplemental deed.

Historical performance* (net of fees)

Period	Fund	Benchmark
1 month	2.97%	2.91%
3 months	8.36%	7.91%
YTD	17.08%	17.19%
1 year	16.77%	17.15%
3 year	13.43%	13.88%
5 year	-	-
Since Launch (Ann.)	12.82%	13.31%
Since Launch (Cum.)	48.49%	50.60%

Performance data longer than 1 year is annualised.

Risk statistics (since launch)

Statistic	Fund	Benchmark
Volatility	5.86%	5.77%
Maximum drawdown	-3.74%	-4.06%
Highest one-year return	21.24%	21.19%
Lowest one-year return	4.46%	5.23%
Sharpe ratio (Rf = STeFI)	0.90	1.00

* Performance is calculated using the Total Returns Index (TRI), net of fees, with all dividend and/or income declarations reinvested on the declaration date at the net asset value price at that time. Investment performance is for illustrative purposes only.

October 2025	0.83c
November 2025	0.16c

Asset allocation

Portfolio composition

This quarter, the Cogence Fixed Interest FoF introduced Ashburton Bond Fund, replacing the previously held Vunani exposure. The Ashburton fund was selected for its strong performance in nominal bond strategies and its ability to complement existing exposures. A reduction was also made to the Laurium BCI Strategic Income Fund, due to key personnel changes. The fund will go under a standard review post these changes. The adjustments aim to enhance yield, duration management, and liquidity, while maintaining robust risk controls.

Monthly market commentary

November brought a more cautious tone to global markets. The United States (US) government shutdown finally ended after 43 days, but the lack of data during the blackout left investors without clear signals. Tech headlines, including Google's Gemini 3 launch and strong Nvidia results, failed to lift sentiment. Rising Japanese yields, a weaker yen and a sharp Bitcoin pullback added to risk aversion. Investors moved to safer assets, reflecting a market starting to question the durability of this year's earlier optimism.

Against this backdrop, developed market equities were down (MSCI World Index -0.90%). The US (S&P 500 -1.0%), UK (FTSE 100 +0.0%) and European (FTSE Europe ex UK -0.1%) markets saw leadership shifting toward more defensive sectors.

Emerging markets (MSCI EM -3.6%) weakened with China drifting lower (MSCI China -3.7%) as cautious risk appetite cooled earlier momentum. Global bond markets also lagged (Bloomberg Global Aggregate -1.0%).

Commodities broadly offered some shelter. Precious metals, especially gold, regained some appeal as investors sought stability amid market jitters. Energy and industrial metals remained under pressure as investor focus shifted away from cyclical risk.

Locally, the South African Reserve Bank (SARB) delivered a 25 basis points (bps) repo rate cut to 6.75%, reflecting improving inflation dynamics and a more accommodative monetary policy stance. This was coupled with a rating upgrade by S&P Global Ratings, the country's first sovereign credit upgrade in nearly two decades, which sent local bond yields to record lows. As a result, South African assets enjoyed a strong month. Equities (JSE All Share +1.7%), listed property (JSE All Property Index +7.8%) and bonds (JSE All Bond Index +3.5%) rallied, while the rand strengthened meaningfully against the US dollar (+1.2%).

That said, the domestic economy showed signs of strain. Private sector activity contracted for a second successive month, as indicated by a sub 50 S&P Global PMI reading. This highlights the economy's underlying fragility, even as markets benefit from improved policy support.

Performance figures are quoted in ZAR.

General

Collective investment schemes (Unit Trusts) are generally medium to long-term investments. The value of participatory interests (units) or the investment may go down as well as up. Past performance is not necessarily a guide to future performance. Collective investment schemes are traded at ruling prices and can engage in borrowing and scrip lending (i.e. borrowing and lending of assets). The manager does not provide any guarantee, with respect to the capital or the return of a portfolio. Prescient retains full legal responsibility for the third-party-named portfolio. Any forecasts and/or commentary in this document are not guaranteed to occur. Different classes of participatory interests apply to these portfolios and are subject to different fees and charges. A schedule of all fees and charges, inclusive of VAT and maximum commissions, is available on request from us or from your financial adviser. Forward pricing is used.

Yields

The yield for bond and income portfolios is historic and is calculated quarterly.

Important information

The collective investment scheme may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. The ability of the portfolio to repurchase is dependent upon the liquidity of the securities and cash of the portfolio. A manager may suspend repurchases for a period, subject to regulatory approval, to await liquidity, and the manager must keep the investors informed about these circumstances.

A fund of funds is a portfolio that invests in portfolios of collective investment schemes that levy their own charges. This could result in a higher fee structure.

Lump-sum performance returns are being quoted. Income distributions, prior to deduction of applicable taxes, are included in the performance calculations. NAV to NAV figures have been used for the performance calculations, as calculated by the manager at the valuation point defined in the deed, over all reporting periods. Investment performance calculations are available for verification upon request by any person. Reinvestment of income is calculated on the actual amount distributed per participatory interest, using the ex-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual reinvestment date. The performance is calculated for the fee class. The individual investor performance may differ, as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax.

The rate of return is calculated on a total return basis, and the following elements may involve a reduction of the investor's capital: interest rates, economic outlook, inflation, deflation, economic and political shocks or changes in economic policy. Annualised returns are period returns re-scaled to a period of one year. This allows investors to compare returns of different assets that they have owned for different lengths of time. All period returns greater than one year have been annualised. Returns for periods less than one year have not been annualised. A cumulative return is the aggregate amount an investment has gained or lost over time, independent of the period of time involved. Actual annual figures are available to the investor on request. Illustrative investment performance is for illustrative purposes only.

Specific fund risks

- Derivatives
- Exposure to foreign securities
- Drawdown
- Liquidity
- Equities
- Bond

For a detailed description of these risks, and other risks that are relevant to the portfolio, please refer to the CIS and other Risk Disclosure Documents, available at www.cogence.co.za.

Glossary

Annualised return - An annualised return is the weighted average compound growth rate over the period measured.

Highest & Lowest return - The highest and lowest returns for any one year over the period since inception have been shown.

Volatility - Volatility (also called standard deviation) is a measure of how widely the returns varied over the period measured.

Maximum drawdown - A maximum drawdown is the maximum loss from a peak to trough of the portfolio over the period measured, before a new peak is attained.

Sharpe ratio - The Sharpe ratio is a measure of risk-adjusted returns. The Sharpe ratio reflects the extent to which an investment compensates for extra risk.

NAV - The net asset value represents the assets of a fund less its liabilities.

What is the total investment charge (TIC)

Total expense ratio (TER) is the percentage of the value of the portfolio that was incurred as expenses relating to the administration (charges, levies and fees) of the portfolio. TER is calculated over rolling 3 years (or since inception, where applicable), and is annualised, to the most recent calendar quarter-end. A higher TER does not necessarily imply a good return. The current TER may not necessarily be an accurate indication of future TER's. Transaction costs (TC) is the percentage of the value of the portfolio that was incurred as costs relating to the buying and selling of the assets underlying the portfolio. Transaction Costs are a necessary cost in administering the portfolio and impacts portfolio returns. It should not be considered in isolation, as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager, and the TER. Calculations are based on actual data, where possible, and best estimates, where actual data is not available. Total investment charges (TIC) is the percentage of the value of the portfolio that was incurred as costs relating to the investment of the portfolio. It is the sum of the TER and TC.

For additional information on the portfolio, refer to the application forms, quarterly investment report and minimum disclosure documents, available on our website, www.cogence.co.za, from your financial adviser, or on request from the manager, free of charge.

The complaints policy and procedure, as well as the conflicts of interest management policy, are available on our website www.cogence.co.za. Associates of the manager may be invested within certain portfolios, and the details thereof are available from the manager. The manager has the right to close certain portfolios to new investors, in order to manage them more efficiently, in accordance with their mandates.

The Manager retains full legal responsibility for any third party-named portfolio. Where foreign securities are included in a portfolio there may be potential constraints on liquidity and the repatriation of funds, macroeconomic risks, political risks, foreign exchange risks, tax risks, settlement risks, and potential limitations on the availability of market information.

- Performance data reflected in the MDD was sourced from morningstar as at 5th December 2025.
- This document was published on 11 December 2025.

Please note that all documents, notifications of deposit, investment, redemption and switch applications must be received by Prescient by or before 13:00 (SA), to be transacted at the net asset value price for that day. Where all required documentation is not received before the stated cut off time Prescient shall not be obliged to transact at the net asset value price as agreed to. Funds are priced at either 3pm or 5pm depending on the nature of the Fund. Prices are published daily and are available on the Prescient website.

This portfolio operates as a white label fund under the Prescient Unit Trust Scheme, which is governed by the Collective Investment Schemes Control Act.

Cogence (Pty) Ltd - Registration 2009/011658/07 – is an authorised financial services provider (FSP No 52242).
