(1) The Total Expense Ratio (TER) generally includes all expense items charged to the Fund apart from transaction costs and performance fees. If the Fund invests portions of its assets in target funds, the costs of the respective target funds will also be taken into account. The Fund incurred the total expenses listed here in its last financial year, which ended on 31/12/2025. They are subject to change from year to year.

Important notice: Distribution agents such as banks or other investment service providers may report costs or expense ratios to interested investors that may differ from and exceed the costs described here. This may be due to new regulatory requirements for the calculation and reporting of costs by these distribution agents, in particular as a result of the implementation of Directive 2014/65/EU (Markets in Financial Instruments Directive - "MiFID2 Directive") from January 3, 2018.

Fund Management's Comment: DWS Invest Top Dividend

Equity Funds - Global

Data in relation to the fund or the leading unit class.

January 2026

As at 30/01/2026

Performance Review

The upward trend in global equity markets continued into the new year. Geopolitical developments quickly moved back into focus at the start of the month, driven by the direct involvement of the United States in Venezuela. Protest movements in Iran and diplomatic tensions between the U.S. and Europe surrounding the "Greenland issue" also attracted significant attention. Prices for gold and other precious metals rose sharply, despite a steep decline on the final trading day. The U.S. Federal Reserve left interest rates unchanged. For equity markets, however, developments related to artificial intelligence and the expansion of computing capacity remained key drivers. A notable divergence emerged within the IT sector. Companies positioned along the AI value chain, particularly memory chip manufacturers, benefited from persistent demand and ongoing global investment in data center expansion, resulting in further substantial share price gains. Conversely, software companies increasingly viewed by the market as potential "AI losers" came under significant pressure.

Gold continued its positive trend from the previous month, rising by 11.70% in January. After a rather weak December, oil prices rallied in January closing 13.57% higher for WTI.

In January, the strongest sectors were Energy and Materials, while Information Technology and Consumer Discretionary underperformed. Our defensive strategy DWS Invest Top Dividend outperformed the broad equity market (MSCI World-Index: no official benchmark, for comparison purpose only). During January, the DWS Invest Top Dividend was up +4.90%.

Performance Attribution

Top 5 single stock contributions came from Samsung Electronics, TSMC, SLB, Agnico Eagle, and Lockheed Martin.

Lockheed Martin: Global geopolitical tensions, amplified by the direct involvement of the U.S. military in Venezuela as well as strong quarterly results drove the strong performance.

SLB: The stock rallied on plans by the U.S. administration to increase oil production and new exploration in Venezuela.

Agnico Eagle: The stock performance followed a strong rally in the gold price.

Bottom 5: On a single stock level Hannover Rück, Abbot Laboratories, Axa, Sampo and Nestlé.

Abbott Laboratories: Shares fell after the company reported fourth-quarter sales that missed estimates and issued disappointing first-quarter earnings guidance, driven by pricing pressures in its nutrition business including baby formula and Ensure drinks.

Sampo: Shares underperformed as investors fear higher-than-expected weather damage in the fourth quarter from storms including Storm Johannes and Storm Amy.

Nestlé: The stock faced pressure from a deepening infant formula contamination crisis that spread from a handful of European countries to more than 50 countries worldwide, prompting widespread product recalls.

On a sector level, Materials and IT contributed positively to the overall performance of the fund, while Consumer Discretionary contributed negatively.

Current Positioning

The portfolio management team reduced the weight of Financials by trimming the position of a Japanese insurance company. In addition, the portfolio management team increased their exposure to Health Care, Utilities and Consumer Staples companies. Currently, companies in the Financials and Health Care sector have the highest weighting in the fund of roughly 17 and 12 percent, respectively, followed by equities from the sectors Energy and Consumer Staples. The fund has the lowest weightings in the sectors Consumer Discretionary and Communication Services. There were hardly any changes on the country level in the past months: US equities still represent the largest stake with about 30 percent, followed by a high proportion in Canada and France. The number of stocks currently stands at around 64. The investment level is currently around 84 percent.

Outlook

After several years of subdued corporate investment in the U.S., capital expenditures – particularly in AI and reshoring – as well as manufacturing activity are expected to pick up, supporting an improvement in GDP growth. Consumers are also likely to benefit from tax incentives. In Europe, fiscal support – especially in Germany – is expected to be a key theme for markets in 2026.

From a monetary policy perspective, we anticipate continued easing in the U.S., with further interest rate cuts likely. In contrast, European central bank policy is expected to remain unchanged in the coming months. A key risk for investors to monitor is inflation, which could arise from stronger economic activity combined with accommodative monetary policy.

For equity markets, we expect mid-single-digit earnings growth in Europe and low-double-digit growth in the U.S. AI is likely to remain a dominant theme, presenting both opportunities and risks. However, we expect earnings growth to broaden beyond AI-driven sectors, with traditional industries also contributing.

Globally, valuations across markets and sectors remain elevated relative to historical levels, implying lower medium-term returns. Nevertheless, some areas – such as defensive sectors – appear relatively attractive given the current AI-driven market dynamics and offer appealing risk-return profiles. We remain focused on valuation discipline in stock selection, prioritizing companies with strong balance sheets, robust free cash flow, and sustainable dividends.

Finally, the fund offers a broader, more diversified, and less concentrated profile compared to many global equity indices.

Opportunities

In accordance with the investment policy.

Risks

- The fund invests in equities. Equities are subject to strong price fluctuations and thus also to the risk of price decreases.
- The fund seeks to generate income from dividends, i.e. from expected distributions per equity. If a company distributes a smaller dividend than expected or no dividend at all, this can have a negative impact on the value of equities or derivatives.
- Due to its composition/the techniques used by the Fund management, the investment fund has elevated volatility, i.e. the share price may be subject to significant fluctuations up or down within short periods of time. The share value may fall below the purchase price at which the customer acquired the share at any time.

Important note on the target market:

Target Market: Growth-oriented

The sub-fund is designed for growth-oriented investors who wish to achieve capital appreciation primarily through equity gains and exchange rate movements. Expected earnings are offset by high equity, interest rate and currency risks as well as creditworthiness risks and the possibility of heavy losses of the invested capital, up to the total amount invested. The investor is willing and able to bear such a financial loss, and does not prioritize capital preservation.

The Company provides additional information relating to the profile of the typical investor or target customer group for this financial product to distribution agents and distribution partners. If the investor is advised on the acquisition of units by the Company's distribution agents or distribution partners, or if they act as brokers in the purchase of units, they may also provide the investor additional information that also relates to the profile of the typical investor.

Supplementary information on the target market and product costs resulting from the implementation of the MiFID2 Directive and made available to distribution agents by the capital management company can be obtained in electronic form from the Company's website at www.dws.com.

General information

When the custodian sets the price on the last trading day of the month there can be a difference of up to ten hours between the times at which the fund price and the benchmark are calculated. In the event of strong market movements during this period, this may result in the over- or understatement of the Fund's performance relative to the benchmark at the end of the month (this is referred to as the "pricing effect").

The information in this document does not constitute investment advice and is only a brief summary of key aspects of the Fund.

Any views expressed reflect the current assessment of DWS Investment GmbH, which may change without notice. Where information contained in this document derives from third parties, DWS accepts no liability for the accuracy, completeness or adequacy of such data, although DWS only uses data that it deems to be reliable.

The gross performance (BVI method) includes all costs incurred at the fund level (e.g. management fee), the net performance also includes the sales charge; additional costs may be incurred at the investor level (e.g. custody costs), which are not included in the presentation. Past performance is not a reliable indicator of future performance.

Further information on taxation can be found in the Prospectus.

This product is based overseas and is not subject to UK sustainable investment labelling and disclosure requirements. Further information in relation to the UK sustainability labelling and disclosure requirements can be found on the UK FCA's website <https://www.fca.org.uk/firms/climate-change-and-sustainable-finance/sustainability-disclosure-and-labelling-regime>.

Important Notice

Investments in funds involve numerous risks including, among others, general market risks, credit risks, foreign exchange risks, interest rate risks and liquidity risks.

Key risk factors to consider before investing:

- Funds are not capital protected investments and investor capital is at risk up to the total amount invested.
- The value of an investment in a fund may go down as well as up and you may get back less than the amount invested.
- Past performance is not a reliable indicator of future results.
- Movements in exchange rates can impact the value of your investment. If the currency of your country of residence is different from the currency in which the underlying investments of the fund are made, the value of your investment may increase or decrease subject to movements in exchange rates.

General Risks

Investing in the shares of a fund involves risks. These can encompass or involve equity or bond market risks, interest rate, credit, default, liquidity and counterparty risks as well as exchange rate, volatility, or political risks. Any of these risks may also occur along with other risks. Some of these risks are addressed briefly below. Potential investors should possess experience of investing in instruments that are employed within the scope of the proposed investment policy. Investors should also understand the risks involved in investing in shares and should not make a decision to invest until they have fully consulted their legal, tax and financial advisers, auditors or other advisor about (i) the suitability of investing in the shares, taking into account their personal financial and tax situation and other circumstances, (ii) the information contained in the Sales prospectus, and (iii) the respective fund's investment policy.

It must be noted that investments made by a fund also contain risks in addition to the opportunities for price increases. The fund's shares are securities, the value of which is determined by the price fluctuations of the assets of the respective fund. Accordingly, the value of the shares may rise or fall in comparison with the purchase price. No assurance can therefore be given that the investment objectives will be achieved.

Market Risk

The price or market performance of financial products depends, in particular, on the performance of the capital markets, are affected by the overall economic environment and the general economic and political framework.

Credit Risk

The fund's performance could be negatively affected if an issuer of a debt security suffers an adverse change in financial condition that results in the issuer not making timely payments of interest or principal, a security downgrade or is unable to meet a financial obligation. Credit risk is greater for lower-rated securities.

Interest rate risk

When interest rates rise, prices of debt securities generally decline. The fund may be subject to a greater risk of rising interest rates due to the current period of historically low rates.

Derivatives Risk

Risks associated with derivatives include the risk that the derivative is not well correlated with the security, index or currency to which it relates; the risk that derivatives may result in losses or missed opportunities; the risk that the fund will be unable to sell the derivative because of an illiquid secondary market; the risk that a counterparty is unwilling or unable to meet its obligation; and the risk that the derivative transaction could expose the fund to the effects of leverage, which could increase the fund's exposure to the market and magnify potential losses.

Counterparty Risk

A financial institution or other counterparty with whom the fund does business or contracts with, or that underwrites, distributes or guarantees any investments, or that the fund owns or is otherwise exposed to may decline in financial health and become unable to honour its commitments.

Liquidity Risk

In certain situations, it may be difficult or impossible to sell an investment.

Exchange Traded Fund (ETF) Risk

Because ETFs trade on a securities exchange, their shares may trade at a premium or discount to their net asset value. An ETF is subject to the risks of the assets in which it invests as well as those of the investment strategy it follows.

A more detailed description of the fund specific risks can be found under 'Risks' in the sales prospectus.

This fund superscript 2) 3) 4) is a sub-fund of DWS Invest (an investment company with variable capital incorporated under Part I of the Luxembourg law dated 17 December 2010 on undertakings for collective investment and the law on trading companies of 10 August 1915 (as amended), as a société d'investissement à capital variable (SICAV), having its registered office at 2, Boulevard Konrad Adenauer, L-1115 Luxembourg and registered with the Luxembourg trade and companies' register under number B. 86.435. The fund qualifies as an undertaking for collective investment in transferable Securities under article 1(2) of the Directive 2009/65/EC of the European Parliament and of the Council of 13 July 2009 on the coordination of laws, regulations and administrative provisions relating to undertakings for collective investment in transferable securities, as may be amended. DWS Investment S.A., a public limited company incorporated under Luxembourg law (société anonyme), having its registered office at 2, Boulevard Konrad Adenauer, L-1115 Luxembourg and registered with the Luxembourg trade and companies' register under number B. 25754 and authorised and regulated by the Commission de Surveillance du Secteur Financier (CSSF) ("DWS"), is the management company of DWS Invest.

Investors should be aware that Deutsche Bank AG and/or its affiliates (the "Deutsche Bank Group") may from time to time own interests in the fund which may represent a significant amount or proportion of the overall investor holdings in the fund. Investors should consider what possible impact such holdings, or any disposal thereof, by the Deutsche Bank Group may have on them.

This document does not create any legally binding obligations on the part of the Deutsche Bank Group. Without limitation, this document does not constitute investment advice and does not constitute an offer, solicitation or recommendation to enter into any transaction.

Full details of the fund can be found in the relevant key investor information document and the sales prospectus, supplemented in each case by the most recent audited annual report and the most recent half-year report, if that report is more recent than the most recently available annual report. These documents constitute the sole binding basis for the purchase of fund units. They are available free of charge (in English) in either electronic or printed form from your advisor or from DWS Investment S.A., 2, Boulevard Konrad Adenauer, L-1115 Luxembourg or on www.dws.com.

All opinions given reflect the current assessment of DWS, which may change without notice. The information contained in this document is believed to be correct, complete and accurate and every effort has been made to represent accurate information. However, no representation or warranty, expressed or implied, is made as to the accuracy, completeness or correctness of the information contained in this document. Neither DWS nor any other member of the Deutsche Bank Group assumes any responsibility or liability for any errors or omissions with respect to this information. The information contained in this document is provided for information purposes only. In the case of any inconsistency with the relevant prospectus of a product, the latest version of the prospectus shall prevail. In cases where information contained in this document derives from third parties, DWS accepts no liability for the accuracy, completeness or appropriateness of such information, although DWS only uses data that it deems to be reliable.

Past performance is not a reliable indicator of future returns. Further information on taxation can be found in the sales prospectus. The units issued by the fund may only be offered for purchase or sold in jurisdictions in which such offer or sale is permitted. The units in the fund are not allowed to be offered for purchase or sold either in the US or to or for the account of US citizens or US persons domiciled in the US. This document and the information contained therein must not be distributed in the US. The distribution and publication of this document as well as the offering or sale of the fund's units may be subject to restrictions in other jurisdictions as well.

The fund is distributed in the United Kingdom by DWS Investments UK Limited of Winchester House, 1 Great Winchester Street, London EC2N 2DB that is authorised and regulated in the United Kingdom by the Financial Conduct Authority (FCA).

Notes:

- 1) Please note that tax treatment depends upon the individual circumstances of each client and may be subject to change in the future.
- 2) The fund may invest more than 35% of its scheme property in transferable securities and money market instruments issued or guaranteed by an EEA state, one or more of its local authorities, a third country or public international body to which one or more EEA states belong.
- 3) The fund invests principally in units in collective investment schemes, deposits or derivatives, or replicates a stock or debt securities index in accordance with COLL 5.2.31R or equivalent national measures implementing articles 53 of the UCITS Directive.
- 4) The net asset value of the fund has, or is likely to have, high volatility owing to its portfolio composition or portfolio management technique.

Issued and approved by DWS Investments UK Limited of Winchester House, 1 Great Winchester Street, London EC2N 2DB, authorised and regulated by the Financial Conduct Authority ("FCA").
