

Robeco Emerging Stars Equities F USD

Robeco Emerging Stars Equities is an actively managed fund that invests in emerging countries equities all over world. The selection of these shares is based on a fundamental analysis. The fund's objective is to achieve a better return than the index. The fund selects investments based on a combination of top-down country analysis and bottom-up stock selection. We focus on companies that have both a healthy and solid business model growth prospects as a reasonable valuation. The fund has a focused, concentrated portfolio with a small number of larger bets.

Performance

Indexed value (until 31-05-2025) - Source: Robeco

Performance

Based on transaction prices, the fund's return was 5.96%.

In May, the fund outperformed the MSCI Emerging Market Index. The outperformance was driven by both country allocation and stock selection. Positive country allocation was driven by South Korea (overweight), India (underweight) and Saudi Arabia (underweight). Negative country allocation came from Brazil (overweight) and Taiwan (underweight). Stocks that did well in May included SK Square (South Korea), which derives most of its value from its stake in SK hynix (memory chips). Selected banks in the fund performed strongly: Alpha Bank (Greece), Bank Rakyat (Indonesia) and Hana Financial (South Korea). Naspers, the South Africa-based EM internet holding company, also outperformed. Sendas Distribuidora (Brazilian hypermarkets) and Vinhomes (Vietnamese property developer) also had a strong relative performance in May. Stocks that lagged in May were to be found in China, with Baidu (online search), China Resources Land (property developer) and e-commerce companies Alibaba and JD.com. In Thailand, Kasikorn Bank also underperformed in May.

Market development

In May, emerging markets equities posted a gain of 4.4% (EUR), lagging developed markets which rose 6.1% (EUR). The rally was fueled in large part by hopes of easing trade tensions, particularly after unexpectedly positive progress in US-China negotiations in Geneva, which led to reduced concerns over a US or global recession and an upward revision to China's GDP outlook. However, by the end of the month, trade uncertainty resurfaced due to emerging legal challenges related to tariff implementation and reports that US-China trade talks had stalled. Another significant market catalyst was renewed enthusiasm for artificial intelligence. Positive capital expenditure guidance from major US tech firms (Microsoft, Meta, and NVIDIA), the reversal of the AI diffusion rule, and new sovereign AI investment agreements from the Middle East all contributed to improved investor sentiment. On the downside, a persistent rise in developed market – especially US – bond yields acted as a headwind. EM currencies continued to strengthen, especially the Taiwanese dollar, the South African rand, and the South Korean won, while the US dollar stabilized.

Expectation of fund manager

The announced US trade tariffs have been a shock to global equity markets and are already leading to lower shipments. Although there is a high degree of uncertainty due to the 90-day pause and potential for new trade deals, it is hurting global business sentiment and could lead to higher US inflation. Exporting companies in emerging markets would also be affected, mostly to be found within the technology, auto and some select consumer sectors. However, as the majority of earnings from emerging companies is domestically focused, we think the US itself will be most impacted. Global investors seem likely to diversify away from the US, which so far has resulted in a weaker US dollar. With the current America First focus, emerging markets are having to rely more on their own domestic policies and growth opportunities. Emerging equity markets' valuations have become very attractive relative to developed markets, with discounts of more than 30% based on earnings multiples. Earnings growth recovered in 2024 to above 20%, while a positive growth of 13% is expected for 2025, well above the 8% expected growth for developed markets.

Top 10 largest positions

TSMC and Samsung Electronics are two globally leading technology companies that combine good growth prospects with attractive valuations. Valuation for Chinese e-commerce company Alibaba remains attractive while it still has positive growth opportunities. Naspers is a South Africa-listed holding company for Tencent and several other internet companies across emerging markets, and is trading at a large discount to the underlying value. The other top ten holdings come from various industries. For all of them, we see attractive valuations combined with high or better-than-expected growth opportunities.

Fund price

31-05-25	USD	194.05

ESG Important information

The sustainability information in this factsheet can help investors integrate sustainability considerations in their process. This information is for informational purposes only. The reported sustainability information may not at all be used in relation to binding elements for this fund. A decision to invest should take into account all characteristics or objectives of the fund as described in the prospectus. The prospectus is available on request and free of charge on the Robeco website.

Sustainability

The fund incorporates sustainability in the investment process through exclusions, ESG integration, engagement and voting. The fund does not invest in issuers that are in breach of international norms or where activities have been deemed detrimental to society following Robeco's exclusion policy. Financially material ESG factors are integrated in the bottom-up investment analysis to assess existing and potential ESG risks and opportunities. In the stock selection the fund limits exposure to elevated sustainability risks. In addition, where a stock issuer is flagged for breaching international standards in the ongoing monitoring, the issuer will become subject to engagement. Lastly, the fund makes use of shareholder rights and applies proxy voting in accordance with Robeco's proxy voting policy.

For more information please visit the sustainability-related disclosures.

The index used for all sustainability visuals is based on MSCI Emerging Markets Index (Net Return, USD).

Sustainalytics ESG Risk Rating

The Portfolio Sustainalytics ESG Risk Rating chart displays the portfolio's ESG Risk Rating. This is calculated by multiplying each portfolio component's Sustainalytics ESG Risk Rating by its respective portfolio weight. The Distribution across Sustainalytics ESG Risk levels chart shows the portfolio allocations broken into Sustainalytics' five ESG risk levels: negligible (0-10), low (10-20), medium (20-30), high (30-40) and severe (40+), providing an overview of portfolio exposure to the different ESG risk levels. Index scores are provided alongside the portfolio scores, highlighting the portfolio's ESG risk level compared to the index.

Only holdings mapped as corporates are included in the figures.

Environmental Footprint

Environmental footprint expresses the total resource consumption of the portfolio per mUSD invested. Each assessed company's footprint is calculated by normalizing resources consumed by the company's enterprise value including cash (EVIC). We aggregate these figures to portfolio level using a weighted average, multiplying each assessed portfolio constituent's footprint by its respective position weight. For comparison, index footprints are shown besides that of the portfolio. The equivalent factors that are used for comparison between the portfolio and index represent European averages and are based on third-party sources combined with own estimates. As such, the figures presented are intended for illustrative purposes and are purely an indication. Only holdings mapped as corporates are included in the figures.

SDG Impact Alignment

This distribution across SDG scores shows the portfolio weight allocated to companies with a positive, negative and neutral impact alignment with the Sustainable Development Goals (SDG) based on Robeco's SDG Framework. The framework utilizes a three-step approach to assess a company's impact alignment with the relevant SDGs and assign a total SDG score. The score ranges from positive to negative impact alignment with levels from high, medium or low impact alignment. This results in a 7-step scale from -3 to +3. For comparison, index figures are provided alongside that of the portfolio. Only holdings mapped as corporates are included in the figures.

Source: Robeco. Data derived from internal processes.

Engagement

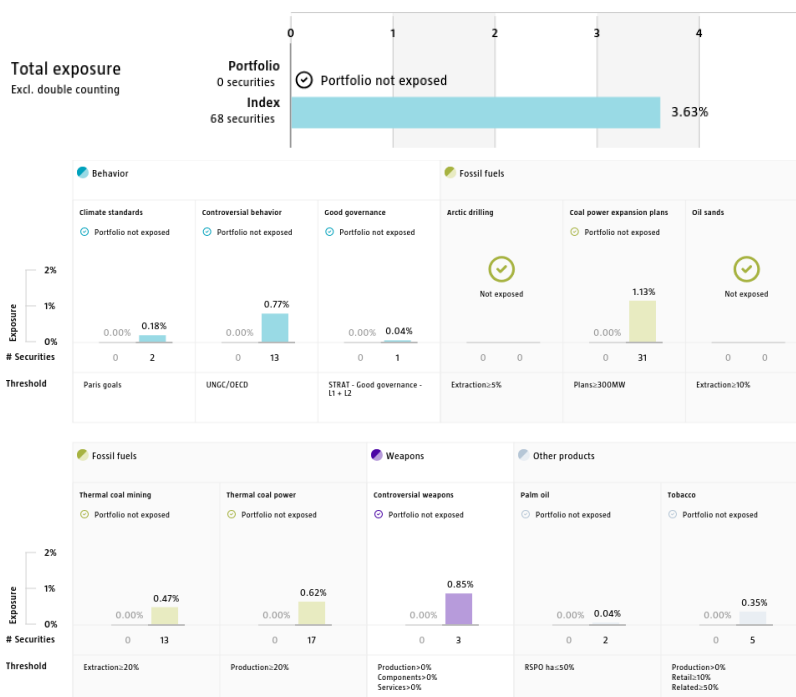

Robeco distinguishes between three types of engagement. Value Engagement focuses on long-term issues that are financially material and/or are causing adverse sustainability impacts. The themes can be broken into Environmental, Social, Governance, or Voting-related. SDG Engagement aims to drive a clear and measurable improvement in a company's SDG contribution. Enhanced engagement is triggered by misconduct and focuses on companies severely breaching international standards. The report is based on all companies in the portfolio for which engagement activities have taken place during the past 12 months. Note that companies may be under engagement in multiple categories simultaneously. While the total portfolio exposure excludes double counting, it may not equal the sum of individual category exposures.

	Portfolio exposure	# companies engaged with	# activities with companies engaged with
Total (* excluding double counting)	43.06%	20	68
Environmental	17.61%	7	32
Social	7.41%	4	13
Governance	3.98%	4	12
Sustainable Development Goals	7.30%	2	7
Voting Related	8.78%	4	4
Enhanced	0.00%	0	0

Investment policy

Robeco Emerging Stars Equities is an actively managed fund that invests in emerging countries equities all over world. The selection of these shares is based on a fundamental analysis. The fund's objective is to achieve a better return than the index. The fund selects investments based on a combination of top-down country analysis and bottom-up stock selection. We focus on companies that have both a healthy and solid business model growth prospects as a reasonable valuation. The fund has a focused, concentrated portfolio with a small number of larger bets. The fund promotes E&S (i.e. Environmental and Social) characteristics within the meaning of Article 8 of the European Sustainable Finance Disclosure Regulation, integrates sustainability risks in the investment process and applies Robeco's Good Governance policy. The fund applies sustainability indicators, including but not limited to, normative, activity-based and region-based exclusions, and proxy voting.

Fund manager's CV

Jaap van der Hart is the Lead Portfolio Manager of Robeco's High Conviction Emerging Stars strategy. Over time, he has been responsible for the investments in South America, Eastern Europe, South Africa, Mexico, China and Taiwan. He also coordinates the country allocation process. He started his career in the investment industry in 1994 at Robeco's Quantitative Research department and moved to the Emerging Markets Equity team in 2000. Jaap holds a Master's in Econometrics from Erasmus University Rotterdam. He has published several academic articles on stock selection in emerging markets. Karnail Sangha is a Portfolio Manager within the Emerging Markets Equity team and provides analytical research coverage on India. He is Co-Portfolio Manager for the Emerging Stars and Sustainable Emerging Stars Equity strategies. Prior to joining Robeco in 2000, Karnail was a Risk Manager/Controller at Aegon Asset Management where he started his career in the industry in 1999. He holds a Master's in Economics from Erasmus University Rotterdam and is a CFA® charterholder. Karnail is also fluent in Hindi and Punjabi.

Fiscal product treatment

The fund is established in Luxembourg and is subject to the Luxembourg tax laws and regulations. The fund is not liable to pay any corporation, income, dividend or capital gains tax in Luxembourg. The fund is subject to an annual subscription tax ('tax d'abonnement') in Luxembourg, which amounts to 0.05% of the net asset value of the fund. This tax is included in the net asset value of the fund. The fund can in principle use the Luxembourg treaty network to partially recover any withholding tax on its income.

Sustainability images

The figures shown in the sustainability visuals are calculated on subfund level.
