Transaction cost	0.10%
Total investment charges (TIC)	2.16%
ISIN	ZAE000169215

Notes

1. The premiums quoted above exclude the underlying investment manager charges.

Fund Profile and Strategy

The Discovery Life Escalator Funds are investment portfolios underlying the investment linked insurance policies issued, or underwritten, by Discovery Life Limited, which have a unique structure that provides investors with protection against downward market movements as well as unlimited growth potential in rising markets. The protection level on each Escalator unit is at least 80% of the highest value the Escalator unit price has ever reached. The guarantee is provided by Deutsche bank, not Discovery Life. This means that the policyholder bears the risk if Deutsche Bank is unable to meet the guarantee for any reason whatsoever.

The Discovery Life Escalator - Discovery Global Equity Feeder Fund is calculated with reference to an apportionment between the underlying Discovery Global Equity Feeder Fund Class A (where Discovery Life Collective Investments (Pty) Ltd is the CIS manager), cash, and a put option (which Discovery Life has bought from Deutsche Bank). The ratio between the assets is dynamically adjusted on a daily basis. As the unit price of the Discovery Global Equity Feeder Fund Class A increases the apportionment to this fund increases and vice versa. This rebalancing is done automatically based on a mathematically defined algorithm managed by Discovery Life and Deutsche Bank.

Underlying Fund Investment Policy

The investment objective of the portfolio is to achieve long-term growth, comprising of both capital and income, primarily through investment in shares of companies in South Africa. The underlying portfolio will have a blend of investments which may include larger, medium and smaller sized companies and will be unrestricted in its choice of companies either by size or industry or the geographical make-up of the portfolio. The underlying portfolio will focus investment on stocks deemed by the manager to be of high quality.

In order to achieve the above objective, the Discovery Global Equity Feeder Fund will, apart from assets in liquid form, consist solely of participatory interests in the Investec GSF Global Equity Fund under the Investec Global Strategy Fund Limited umbrella scheme which in turn invests principally in quoted equity securities on an international basis.

The portfolio may also include listed and unlisted financial instruments for the exclusive purpose of hedging exchange rate risks.

Illustrative Cumulative Performance for a R100 Lump Sum Investment Since Launch

Historical Performance Table - Since Launch

Period	Fund	Protection
1 year (Ann.)	7.01%	12.24%
3 year (Ann.)	9.66%	7.73%
5 year (Ann.)	7.96%	9.44%
10 year (Ann.)	7.22%	7.71%
Since Launch (Ann.)	10.82%	11.42%
Since Launch (Cum.)	264.84%	290.62%

Risk Statistics Table - Since Launch

Statistic	Fund
Volatility (Last 3 Years Ann.)	14.06%
Maximum Drawdown	-15.22%
Best Annual Return	50.19%
Worst Annual Return	-11.40%
Sharpe Ratio (Rf = 0%)	0.89
Information Ratio	-0.06

Performance figures are calculated using the Total Returns Index (TRI) for a R100 lump sum investment made at launch. The TRI is calculated by purchasing and reinvesting units on the declaration date at the Net Asset Value (NAV) price as at the reinvestment date. The TRI on any day is adjusted for NAV movements and dividend declarations. The performance is shown as net of asset management fee. Investment performance is for illustrative purposes only. Investment performance is calculated by taking the actual applicable initial fees, and all ongoing portfolio fees, into account, for the value shown. Income is reinvested on the reinvestment date.

Specific Underlying Fund Risks

Please note that following market falls, the Escalator Fund may have a high allocation to cash. This will result in a low exposure to movements in the underlying fund which means the Escalator will not fully participate in sharp market rises following such a market drop, should they occur.

Currency exchange risk - Changes in the relative values of different currencies may adversely affect the value of the Fund's investments and any related income.

Default risk - There is a risk that the issuers of fixed income investments (e.g. bonds) may not be able to meet interest payments nor repay the money they have borrowed. The worse the credit quality of the issuer, the greater the risk of default and therefore investment loss.

Derivatives risk - The use of derivatives may increase the overall risk in the Fund by multiplying the effect of both gains and losses. This may lead to large changes in the value of the Fund and potentially large financial loss.

Developing market risk - Some of the countries in which the Fund invests may have less developed legal, political, economic and/or other systems. These markets carry a higher risk of financial loss than those in countries generally regarded as being more developed.

Interest rate risk - The value of fixed income investments (e.g. bonds) tends to decrease when interest rates and/or inflation rises.

Multi-asset investment risk - The Fund is subject to possible financial losses in multiple markets and may underperform more focused funds.

Third party operational risk - The Fund's operations depend on third parties. Investors in the Fund may suffer disruption or financial loss in the event of third-party operational failure.

FAIS and Insurance Disclosures

This information is not advice, as defined and contemplated in FAIS. The value of a portfolio can go down, as well as up, as a result of changes in the value of the underlying investments, or of currency movement. An investor may not recoup the full amount invested. The policy benefits of the linked policies are determined solely on the value of the assets, or categories of assets, to which the policies are linked. Past performance is not necessarily an indication of future performance. The performance figures of the investment portfolio are based on a lump sum investment, over the respective periods shown. The performance figures of the investment portfolio underlying the investment linked insurance policies will differ from the performance returns of the policies, due to Discovery Life's administration and policy fees (if applicable). The underlying funds may levy their own charges. The value and performance figures of the investment portfolio are based on valuation prices received from Deutsche Bank. Actual trade prices may differ marginally. Forecasts, illustrations, hypothetical data, and examples are for illustrative purposes only, and are not guaranteed to occur. The projections are subject to market influences and contingent upon matters outside the control of the company, so may not be realised in the future. Please be advised that there may be supervised representatives. The complaints policy and conflict of interest management policy can be found on the website: www.discovery.co.za. The assets underlying the Discovery Life Escalator Funds are held on Discovery Life's balance sheet, except for the instrument that provides the 80 **Total Investment Charge**

Total expense ratio (TER) is the percentage of the value of the portfolio that was incurred as expenses relating to the administration (charges, levies and fees) of the portfolio. TER is calculated over rolling 3 years (or since inception, where applicable), and is annualised, to the most recent calendar quarter-end. A higher TER does not necessarily imply a good return. The current TER may not necessarily be an accurate indication of future TER's.

Transaction costs (TC) is the percentage of the value of the portfolio that was incurred as costs relating to the buying and selling of the assets underlying the portfolio. Transaction Costs are a necessary cost in administering the portfolio and impacts portfolio returns. It should not be considered in isolation, as returns may be impacted by many other factors over time, including market returns, the type of financial product, the investment decisions of the investment manager, and the TER. calculations are based on actual data, where possible, and best estimates, where actual data is not available.

Total investment charges (TIC) is the percentage of the value of the portfolio that was incurred as costs relating to the investment of the portfolio. It is the sum of the TER and TC.

Discovery Life Investment Services (Pty) Ltd (Discovery Invest) is an authorised FSP, licensed for Category I (advice and non-discretionary intermediary services), Category II (discretionary FSP), and Category III (administrative FSP). The investment portfolios underlying the investment linked insurance policies issued by Discovery Life may be administered on the Discovery Invest administrative platform.

Performance Returns

Lump-sum performance returns are being quoted. Income distributions, prior to deduction of applicable taxes, are included in the performance calculations. NAV to NAV figures have been used for the performance calculations, as calculated by the manager at the valuation point defined in the deed, over all reporting periods. Investment performance calculations are available for verification upon request by any person. Reinvestment of income is calculated on the actual amount distributed per participatory interest, using the ex-dividend date NAV price of the applicable class of the portfolio, irrespective of the actual reinvestment date. The performance is calculated for the fee class. The individual investor performance may differ, as a result of initial fees, the actual investment date, the date of reinvestment and dividend withholding tax. The rate of return is calculated on a total return basis, and the following elements may involve a reduction of the investor's capital: interest rates, economic outlook, inflation, deflation, economic and political shocks or changes in economic policy. Annualised returns are period returns re-scaled to a period of one year. This allows investors to compare returns of different assets that they have owned for different lengths of time. All period returns greater than one year have been annualised. Returns for periods less than one year have not been annualised. A cumulative return is the aggregate amount an investment has gained or lost over time, independent of the period of time involved. Actual annual figures are available to the investor on request. Illustrative investment performance is for illustrative purposes only.

Additional Information

For additional information on the portfolio, refer to the following documents, available on our website www.discovery.co.za, from your financial adviser, or on request from the manager, free of charge.
