

Momentum Small/Mid-Cap Fund

Class B3 | Minimum Disclosure Document (MDD) as at 31 January 2026

Benchmark: FTSE/JSE All Share Index (J203T)

Investments managed by: Momentum Securities (Pty) Ltd

Fund profile

The fund is an actively managed, largely domestic, equity portfolio that aims to maximise returns over the FTSE/JSE All Share Index over time through investment in small and mid-cap stocks. The fund is suited to investors with a high risk profile with a tolerance for capital volatility over the short to medium term and a five year or more investment horizon. A value style underpins equity allocations.

Investment strategy

The fund invests in small and mid-cap stocks listed predominately on the JSE. Equity will comprise a minimum of 80% of the fund. Offshore allocations of up to 45% provide further return opportunities and diversification benefits. The fund is not benchmark cognisant and its composition can differ substantially from other equity funds and market indices given its contrarian approach and emphasis on absolute value.

Fund information

Inception date:	02 May 2000
Launch date:	02 July 2007
Benchmark:	FTSE/JSE All Share (J203T) (FTSE/JSE SWIX All Share (J403T) until 31/12/2025)

Investment objective/policy

The Momentum Small/Mid Cap Fund is a specialist portfolio, having the primary objective of growth of capital for investors. The Manager will focus on achieving this objective where the securities to be acquired for the Momentum Small/Mid Cap Fund will be comprised, in the main, of those companies, both local and international, offering special opportunities, such as smaller market capitalisation and emerging companies that offer above average growth potential, as well as established companies with sound recovery prospects from a low earnings base, and any other securities which are considered consistent with the portfolio's investment objectives, cash, and any other securities that the Act may from time to time allow, all to be acquired at fair market prices. Interest bearing instruments in a currency other than the Republic of South Africa, may only be included in this portfolio if they comply with a credit rating of investment grade by the credit rating agencies approved by the Registrar, provided further that if the grading of an instrument differs between the rating agencies, the lower of the two gradings will apply. The manager may from time to time invest in participatory interests or any other form of participation in portfolios of collective investment schemes or other similar collective investment schemes as the Act may allow from time to time, and which are consistent with the portfolio's investment policy. Where the aforementioned schemes are operated in territories other than South Africa, participation in portfolios of these schemes will be included in the portfolio only where the regulatory environment is of sufficient standard to provide investor protection at least equal to that in South Africa.

Fund limits and constraints

- Maximum exposure limits as per the ASISA fund classification structure.
- Minimum 80% of the portfolio in shares which have a market cap smaller than the company with the lowest market cap in the FTSE/JSE Top 40 Index.
- 100% of share purchases must be in this investable universe at time of purchase.

Industry allocation

Specific risks

Small and mid-cap stock may experience more volatile returns than the broader market, especially when markets correct severely. Liquidity risk is also higher meaning redemption requests could be delayed in times of market stress. Periods where momentum style returns significantly outperform value style returns will likely result in relative underperformance. This portfolio is permitted to invest in foreign securities which, within portfolios, may have additional material risks, depending on the specific risks affecting that country, such as: potential constraints on liquidity and the repatriation of funds; macroeconomic risks; political risks; foreign exchange risks; tax risks; settlement risks; and potential limitations on the availability of market information. Fluctuations or movements in exchange rates may cause the value of underlying international investments to go up or down. Investors are reminded that an investment in a currency other than their own may expose them to a foreign exchange risk.

Cost ratios

Period (annualised) 01/10/2022 to 30/09/2025	Percentage (incl. VAT)
Total expense ratio (TER)	1.51%
Transaction cost ratio (TC)	0.60%
Total investment charges (TIC) (TER + TC)	2.11%
Financial year-end TER to 30/06/2025	1.52%

Please see Disclosures section for further information on cost ratios.

Disclosures

Momentum Collective Investments (RF) (Pty) Ltd (the “Manager”), registration number 1987/004287/07, is authorised in terms of the Collective Investment Schemes Control Act, No. 45 of 2002 (CISCA) to administer Collective Investment Schemes (CIS) in Securities. The Manager is the manager of the Momentum Collective Investments Scheme, and Momentum Group Limited is a full member of the Association for Savings and Investment SA (ASISA). Standard Bank of South Africa Limited, registration number 1962/000738/06, is the trustee of the scheme. Momentum Small/Mid-Cap Fund is a portfolio of the Momentum Collective Investments Scheme and Momentum Securities (Pty) Ltd, registration number 1974/000041/07, an authorised financial services provider (“FSP”) under the Financial Advisory and Intermediary Services Act No. 37 of 2002 (“FAIS”), FSP number 29547, is the investment manager of this portfolio.

The Total Expense Ratio (TER) is the percentage of the net asset value of the class of the Financial Product incurred as expenses relating to the administration of the Financial Product. A higher TER does not necessarily imply a poor return, nor does a low TER imply a good return. A current TER may not necessarily be an accurate indication of future TER's. The disclosed TER is shown as an annual percentage based on data for the period from 01 October 2022 to 30 September 2025. The Transaction Costs Ratio (TC) is the percentage of the net asset value of the Financial Product incurred as costs relating to the buying and selling of the assets underlying the Financial Product. Transaction costs are a necessary cost in administering the Financial Product and impacts Financial Product returns. The TC should not be considered in isolation as returns may be impacted by many other factors over time including market returns, the type of Financial Product, the investment decisions of the investment manager and the TER. The disclosed TC is shown as an annual percentage based on data for the period from 01 October 2022 to 30 September 2025. The Total Investment Charges (TIC) is the sum of the TER and the TC and is shown as a percentage depicting the annual costs relating to the investment of the Financial Product. Cost ratios are calculated using historical actual and/or estimated data and are provided solely as an indication/guide as to the annual expenses/costs that could be incurred. These ratios do not represent any current/actual charges or fees.

All portfolio performance is calculated for a portfolio/portfolio class. Individual investor returns may differ as a result of fees, actual date(s) of investment, date(s) of reinvestment of income and withholding tax. All portfolio performance shown is net of the Total Investment Charges (TIC) but excludes any initial or ongoing advisory fees that may, if applicable, be charged separately. Annualised returns, also known as Compound Annualised Growth Rates (CAGR), are calculated from cumulative returns; they provide an indication of the average annual return achieved from an investment that was held for the stated time period. Actual annual figures are available from the Manager on request. All portfolio performance figures quoted (tables and charts where present) are as at 31 January 2026, based on a lump sum investment, using NAV-NAV prices with income distributions reinvested on the ex-dividend date. CPI/Inflation figures, where present, are lagged by one month. Cash figures, where present, are STeFI Composite Index returns. All figures quoted in ZAR. Source: Morningstar and/or Momentum.

CIS are generally medium to long-term investments. The value of participatory interests may go down as well as up and past performance is not necessarily a guide to the future. CIS are traded at ruling prices and can engage in borrowing and scrip lending. The CIS may borrow up to 10% of the market value of the portfolio to bridge insufficient liquidity. Different classes of units apply to portfolios, which are subject to different fees and charges. A schedule of fees and charges and maximum commissions is available on request from the Manager. The Manager reserves the right to close and reopen certain portfolios to new investors from time to time in order to manage them more efficiently in accordance with their mandate. This portfolio is valued daily at approx. 15h00. Latest prices can be viewed at www.momentum.co.za/collectiveinvestments and in some national newspapers. Forward pricing is used. Instructions must reach the Manager before 14h00 to ensure same-day value. The Manager does not provide any guarantee, either with respect to the capital or the return of this portfolio. Additional information on the proposed investment including, but not limited to, brochures, application forms and the annual report and any half yearly report can be obtained, free of charge, at www.momentum.co.za/collectiveinvestments or on request from the Manager.

This document should not be seen as an offer to purchase any specific product and is not to be construed as advice. Investors are encouraged to obtain independent professional investment and taxation advice before investing with or in any of the Manager's products.
