# THE CHILD PROTECTOR BENEFIT

## Protect your children against the impact of child-specific severe illnesses, disabilities and traumas

*Limited local insurance cover, combined with the high costs of medical treatments at local and international centres of excellence, creates hurdles to accessing the treatment your child needs. With 1 in 10 children expected to suffer a life-changing event before the age of 18, ensuring that you can access the care they need is essential.\**

The Child Protector Benefit from Discovery Life offers world-leading protection that covers relevant severe illnesses. This includes boosted payouts if treatment is required overseas, 100% payouts for all childhood cancers, comprehensive sports disability and trauma cover as well as a built-in funeral benefit. With this benefit, you can rest assured that your children can access the most advanced care locally and globally.

### HOLISTIC PROTECTION FOR YOUR CHILDREN

#### Market-leading protection

-  Severe illness payouts of between 5% and 100% tailored for childhood-specific conditions in all major body systems. This includes a 100% payout for all childhood cancers.
-  Protection for an extensive list of trauma events, from burns to bone fractures, ICU admissions, sports injuries and more.
-  A funeral benefit of up to R30,000, depending on age at death.
-  The most comprehensive multiple claims facility in the market.

#### Globally relevant

-  Up to 2.5 times the insured amount on a Purple Life Plan (1.8 times on Classic) to access the most advanced medical care globally with the Global Treatment Benefit.
-  Cancer Exome Sequencing Benefit of up to R35,000 on a Purple Plan.

#### Highest cover

-  To facilitate access to the most appropriate treatment, including at international centres of excellence, the Child Protector Benefit provides cover of up to R6.4 million, highest in the South African market.\*
